What's the Matter with the Hog Market?

Producer Suggestion That Packer Hog Supply Be Kept on a Hand-to-Mouth Basis Does Not Seem Such a Bad Idea — If the Packer Would Only Adopt It!

The September break in the hog market caused producers much concern, and as always they began to look about for somewhere to place the responsibility. Some in high places seemed inclined to blame the packer.

The packer does not need to point out the cause of the break. He has troubles of his own in coping with the situation. Even with the amazing volume of distribution which has taken place, packers have continued to face heavy marketings of immature hogs which circumstances and habit have forced too many to buy at unprofitable prices.

How long can the packer continue to play Santa Claus for the producer under such conditions?

Too Many and Poor Hogs.

An answer to the inquiry as to causes of the hog price break is given by a producers' paper when it calls attention to the fact that hog receipts at 7 markets in September were 400,000 greater than a year ago, 600,000 above two years ago, and nearly 800,000 more than three years ago. Even the 1918 volume was exceeded by nearly 600,000.

Attention is called to the fact that the

liquidation of light hogs and grassy sows resulted in an accumulation of stale stock on the markets. "Had the trash in September's hog supply been held back," says this producers' paper, "the market doubtless would have been equal to a better performance."

Must the packer buy "trash" as well as good hogs, whether or not he has a profitable outlet for the product? Apparently some people think he must.

And it would seem that he thinks so himself, judging from the trend of comment in the discussion on "What's the Matter with the Packing Business?" which has raged in the columns of THE NATIONAL PROVISIONER for the past year.

Effect of Orderly Marketing.

In contrast to this false and costly notion is the reminder of the producers' paper aforesaid that "the orderly marketing of young hogs during October, November and December will exert a potent influence on prices." It is suggested that if packers can be kept on a hand-to-mouth basis at the beginning of the winter season, the market may get a favorable start.

This sounds like a suggestion for mar-

ket control in the interest of the producer. As a matter of fact, such an outcome would be of equal benefit to the packer. Orderly marketing would help them both.

The trouble is that the producer seems unwilling to try the remedy. The first three weeks in October have seen a continued flood of "trash" in the hog market, which packers foolishly have continued to try to absorb.

A packer who has been watching the situation, writes to THE NATIONAL PROVISIONER calling attention to this state of affairs. He quotes the advice from producer sources for orderly marketing. He calls attention to the fact that hog marketing is no longer on a seasonable basis, and neither is pork packing.

The able discussion of this subject by F. Edson White at the recent packers' convention is called to mind. Packers are advised once more to buy their hogs only when they can see a cut-out profit, and to buy as the producer organ suggests, on a "hand-to-mouth" basis, at least for the present.

If the new season can get a fair start, there may be a chance for the producer and packer alike to "get by" this year, and

The National Provisioner Daily Market Service

On Monday, October 22, THE NATIONAL PROVISIONER began issuance of a Daily Market Service.

This new feature is merely an extension of the service already given the industry through the news, technical and trade departments of THE NATIONAL PROVISIONER, including the furnishing of practical information, market charts, test forms, cost analyses, etc.

The new Daily Market Service includes provisions, lard, tallows and greases, sausage materials, etc. It covers both domestic and export markets.

It is mailed each day at the close of trading, and is supplemented by a free telegraphic service to subscribers (messages collect).

The aim is to make it of the greatest practical value to everyone connected with the meat industry to whom the knowledge of daily market prices and the trend of daily trading is of importance.

Information concerning the Daily Market Service may be obtained upon application to THE NATIONAL PROVISIONER, Old Colony Bldg., Chicago, Ill.

the packer will not have to repeat the disastrous experiences of a year ago.

This letter says:

How to Buy Hogs

Chicago, October 25, 1923.

Editor THE NATIONAL PROVISIONER:

I have read in "The Breeder's Gazette" an article captioned "Winter Hog Prices." They go on to give approximate figures on the marketing of hogs during July, August and September, showing an enormous increase in the supply compared to 1922.

The information contained in this article is not new to any packer.

In the last paragraph of this article they suggest this to the producers:

"The orderly marketing of young hogs during October, November and December will exert a potent influence on prices. Stocks of meats and lard will be reduced, if not eliminated, during the next sixty days, and if killers can be kept on a hand-to-mouth basis at the inception of the winter packing season, the market will be afforded a favorable beginning."

Recent Immature Hog Runs.

Analyzing this paragraph, attention is called to the heavy marketing of hogs, largely in an immature condition, over the past three weeks. Packers have all, perhaps, made an effort to keep the pens clean and buy these hogs, although they are largely of the unfinished kind, and on paper they may show a moderate profit. But it is problematical what prices they will get for this product when it is cured and ready for the market.

Generally speaking, the reports show that stocks on hand as held by the packers throughout the country, and particularly in some cuts, are still heavy. It is doubtful if sixty days will eliminate or even substantially reduce the total.

Buy on Hand-to-Mouth Basis.

It would be well, perhaps, to adapt ourselves to the suggestion of working on a hand-to-mouth basis at the inception of the winter packing season. In fact, to my mind, it is imperative that, unless we do watch our step and our buying operations at this time, we will get off to a false start. We will be sorry later, and have many things to regret, the same as we have had in the past.

There have been many articles written during the past two years on the question of "What's the matter with the packing business?" and also on the question of hog buying. The article written by Mr. F. Edson White, which was read at the packers' convention at Atlantic City, is well worth re-reading, and should be thoroughly analyzed, particularly as to the question of the change in the packing business—that we have more or less come to a point where the supply of hogs is not seasonable.

It is an all-the-year-around proposition. This is not altogether in the supply of hogs, but is about the same in sales of product—the trade is pretty general most of the time. There will always be a falling off at some season of the year in the demand for different products, but trade usually will take enough of other products

to keep a pretty constant demand, and enough volume of business to keep totals pretty well balanced.

How to Get a Fair Basis.

Therefore, I would like to suggest for the consideration of the trade in general these two points:

1st—Buy your hogs with a cut-out profit at all times, or buy very light.

2nd—Just at this time of year adopt the suggestion as quoted from the Breeder's Gazette. Keep on the "hand-to-mouth basis" in your buying, at least for the next thirty days. Figure that you are always going to have hogs, and there will be plenty of time to get all you want of the heavy crop which is before us.

Remember that this is no longer a seasonable business, that the probabilities are we are going to have hogs enough to take care of all requirements, and if we buy for our requirements there will be no question of the hog market working around to a fair basis for all concerned. This includes producer as well as packer.

Yours truly,

A PACKER.

WHY THE HOG MARKET BROKE.

The following article from "The Breeder's Gazette" of October 18 discusses the hog market break as follows:

"Several more or less logical reasons may be assigned for the September break in hog values. Seven leading markets received 1,653,325 head, compared with 1,246,165 head in September last year, 1,039,311 in 1921, and 882,816 in 1920. Even in 1918, September produced only 1,054,988 hogs at these markets, and, on this occasion, the smaller points were all congested, eastern markets getting so many hogs that the shipping demand in Chicago was materially reduced.

"Another depressing factor was liquidation of light hogs and 'grassy' sows, which, figuring as hogs in the count, were unpopular with killers, and created an accumulation of stale stock. Invariably when 12,000 to 15,000 hogs, regardless of what they are, must be carried over night in Chicago the market gets a bad start the next day. The

handicap extends to every market in the country.

"Had the trash in September's hog supply been held back in the country, the market would doubtless have been equal to a better performance. Just why raisers in some regions jettisoned young hogs off grass at a serious sacrifice, while others took every stock pig available at southern markets, paying prices out of line with current values of finished hogs, is one of those inexplicable trade angles that develop periodically.

"With light and disappearing stocks of lard and meats, packers had no incentive to support the hog market during September, for the purpose of maintaining values or stimulating distribution of their holdings; in fact, their interest lay in buying hogs as low as possible, as they were confident of free marketing right along. Despite what was probably a record September hog run, not only was the product made during that month sold, but stocks were depleted, that of lard shrinking from 79,433,000 pounds on September 1 to 48,902,000 pounds on October 1, while meat stocks dropped from 314,231,000 pounds on the former date to 251,486,000 pounds on October 1.

"When young eastern hogs shall have been marketed shipper competition will revive, and once killers get squared away for the winter packing season, working on a crop of good hogs, it will be possible to form conclusions as to the probable course of the market. September's excess supply of thin underweights and 'grassy' sows was a mistake, from the producers' standpoint."

INTERSTATE COMMERCE CASES.

Complaints made recently to the Interstate Commerce Commission and decisions rendered by the commission in cases of interest to meat packers are reported as follows:

Unjust Rates on Fertilizer—No. 15230. E. Rauh & Sons Fertilizer Co., Indianapolis, Ind., vs. Akron, Canton & Youngstown, et al. Unjust, unreasonable, discriminatory and prejudicial rates on fertilizer in C. F. A. territory. Asks cease and desist order, just and reasonable rates and reparation.

Packers Ask Lower Oil Rates—No. 15232. Swift & Co., Chicago, Ill., vs. Santa Fe et al. Unjust, unreasonable rates on fuel and crude oil from Oklahoma and Kansas points to South St. Joseph, Mo., and South Omaha, Neb. Asks cease and desist order, just and reasonable rates and reparation.

Unjust charges on Private Tank Cars.—No. 15162. International Agricultural Corporation, Atlanta, Ga., vs. Atlanta & West Point, et al. Unjust and unreasonable demurrage charges on private tank cars when held on private tracks. Asks that carriers amend their tariffs so as to exempt from demurrage charges privately owned or leased cars when held on private tracks where notification of lessee's interest therein is evidenced in manner other than by boarding or stenciling. Also asks for waiver of collection of demurrage charges.

The interstate commerce commission in December directed an inquiry into the proper rules governing weights and carload shipments of hogs within the territory comprising Illinois, Nebraska, Wisconsin, South Dakota, Kansas, Iowa, Oklahoma, and Texas. Speaking of the order, Commissioner Browne stated that heavily loaded cars have resulted in causing bigger damages to the load.

Dressed Poultry, Butter and Egg Rates.—No. 15221. Swift & Co., Chicago, vs. Director-General, as agent.

Unlawful rates in violation of section 6 on shipments of dressed poultry, butter and eggs from complainant's produce plants to eastern and Canadian destinations because of refusal of defendant to pay published allowances for initial icing. Asks reparation.

Short Form Hog Test

Knowing what your hogs cost you alive, are you able to tell each day your cutting profit or loss per hog or per cwt.?

In a recent issue THE NATIONAL PROVISIONER printed a "short form hog test," giving the percentage yields of all cuts and offal for 200 lb., 250 lb. and 300 lb. hogs, with computations for losses, credits and expenses, so that the net profit or loss per hog or per cwt. might be figured almost at a glance.

This test, in table form, has been reprinted on heavier paper, and is available to subscribers upon application to THE NATIONAL PROVISIONER, Old Colony Bldg., Chicago, Ill. Copies will be supplied only as long as they last.

LOOK FOR WHAT IS BEST PACKER HOG TYPE

Some Slaughter Yields from Recent Experiments

By Sleeter Bull, Assistant Professor of Animal Husbandry, University of Illinois.

[EDITOR'S NOTE. — The matter of hog types is of just as much importance to the packer as the producer, particularly so when the trend of production for the past few years has rapidly gone toward the leggy, rangy type. Therefore, the experiments conducted at the Agricultural Experiment Station of the Illinois College of Agriculture, University of Illinois, by Professor Sleeter Bull, are of practical value. Packers who were present found them very instructive.]

In our hog type experiments the following results were obtained:

At the approximate weight of 225 pounds, 15 pigs of each lot were slaughtered and the carcasses cut into the regular wholesale cuts. Each cut was then divided into lean, fat, skin and bone. The results are tabulated below.

The average dressing percentages of the three lots were as follows: Lot B (chuffy type), 76.95 per cent; Lot C (intermediate type), 77.64 per cent; and Lot D (rangy type), 77.38 per cent. In other words there was no difference in the dressing percentage of the three types.

Various measurements were made of the carcasses, and it was found that the

of bone. The amount of trimmings from the carcasses of the rangy pigs was more than 10 per cent greater from the other carcasses. The difference was due largely to the greater amount of neck in the rangy type.

The percentages of fat back and leaf fat in the chuffy and intermediate carcasses were practically the same, but were considerably greater than the same cuts of the rangy type, undoubtedly due to the lower condition of the pigs of the latter type. The hams and bellies of Lots B and C were of the highest grade in every respect. The hams were full and meaty with no excess of fat. The bellies were beautifully streaked with lean and fat and had wonderful quality. Representatives of packers stated that they would make the highest grade of bacon. The hams of Lot D did not carry down well toward the shank, but nevertheless would have made smoked hams of high grade. The bellies were soft, flabby, unfinished and lacked

TYPICAL BELLY FROM RANGY TYPE OF HOG.

length and depth of the body proper were practically the same for all lots. However, the legs, necks and heads of the rangy pigs were considerably longer than those of the pigs of the other lots.

The carcasses of the pigs of Lots B and C were firm, smooth, and well finished, but not too fat. In general, they were considerably shorter than the carcasses of the rangy type due to the longer legs, necks, and heads of the latter. The carcasses of

quality. In fact, the rangy type showed up poorly in this cut.

Practically all the cuts of the rangy pigs contained a higher percentage of skin and bone than the corresponding cuts from the pigs of the other lots. On the other hand, most of the cuts from the rangy pigs contained more lean and less fat than the same cuts from the other pigs, due to the higher condition of the latter. However, as stated before, the pigs from the

TYPICAL BELLY FROM INTERMEDIATE TYPE OF HOG.

the rangy type were not finished, were soft and flabby to the touch, and were deficient in quality.

Average Cutting Percentages.

The average cutting percentages, i. e., the weight of each wholesale cut figured in per cent of carcass weight, were practically the same for all three lots in cases of clear plates, hams, shoulders, bellies and loins. The neck bones, spare ribs, and feet of the rangy type were slightly greater, undoubtedly due to the greater amount

chuffy and intermediate lots could not be criticized as being over-fat.

Per Cent Lean, Fat, Skin, Bone.

The average percentages of lean, fat, skin and bone in the carcasses of the three lots were as follows:

	Lean.	Fat.	Skin.	Bone.
Chuffy lot.....	42.9	39.9	5.0	12.2
Intermediate lot.....	44.0	37.8	5.5	12.7
Rangy lot.....	44.3	35.5	6.0	14.2

In general, we feel safe in saying that, from the butcher's standpoint, the pigs of Type C (intermediate) were the most desirable, with the pigs of Type B (chuffy)

TYPICAL BELLY FROM CHUFFY TYPE OF HOG.

ranking a close second. The pigs of Type D (rangy) would have been less objectionable if they had been slaughtered at a heavier weight with more condition. However, in this connection it should be remembered that the trend of the market is toward lighter and not toward heavier weights.

The cutting test and physical composition of cuts were found to be as follows:

	Type B. "Chuffy."	Type C. "Intermediate."	Type D. "Rangy."
Fat Back—(Per cent of carcass)	9.30	9.32	8.10
Skin (per cent of fat back)	9.0	9.7	11.6
Fat (per cent of fat back)	90.8	90.2	88.4
Clear Plate—(Per cent of carcass)	3.01	3.44	3.20
Skin (per cent of clear plate)	10.3	10.6	11.5
Fat (per cent of clear plate)	89.1	89.5	87.9
Ham—(Per cent of carcass)	20.24	19.76	20.85
Lean (per cent of ham)	51.7	53.9	54.4
Fat (per cent of ham)	33.7	31.6	29.6
Skin (per cent of ham)	4.5	4.8	5.2
Bone (per cent of ham)	9.1	9.3	10.2
Picnic—(Per cent of carcass)	8.20	7.65	8.40
Lean (per cent of picnic)	49.2	51.9	49.4
Fat (per cent of picnic)	34.2	31.8	32.4
Skin (per cent of picnic)	5.3	5.8	5.9
Bone (per cent of picnic)	10.8	11.3	11.6
Boston—(Per cent of carcass)	6.33	7.01	6.91
Lean (per cent of Boston)	83.8	87.3	86.9
Fat (per cent of Boston)	10.7	7.4	7.7
Bone (per cent of Boston)	4.3	4.8	4.9
Loins—(Per cent of carcass)	14.26	14.25	14.00
Lean (per cent of loins)	66.5	67.9	67.5
Fat (per cent of loins)	13.7	12.8	10.6
Bone (per cent of loins)	19.2	18.9	20.9
Belly—(Per cent of carcass)	13.50	13.18	12.09
Lean (per cent of belly)	43.8	43.9	41.8
Fat (per cent of belly)	50.2	49.5	50.3
Skin (per cent of belly)	5.7	6.7	7.7
Spare Ribs—(Per cent of carcass)	1.7	1.88	1.94
Lean (per cent of spare ribs)	53.1	48.8	49.7
Bone (per cent of spare ribs)	46.6	49.8	49.8
Head—(Per cent of carcass)	7.08	6.70	6.75
Lean (per cent of head)	20.6	21.3	20.7
Fat (per cent of head)	38.0	29.8	27.9
Skin (per cent of head)	12.1	14.7	14.2
Bone (per cent of head)	28.8	33.6	36.3
Feet—(Per cent of carcass)	2.1	2.03	2.44
Skin (per cent of feet)	15.1	13.5	14.0
Bone (per cent of feet)	84.2	86.3	85.2
Neck Bones—(Per cent of carcass)	1.21	1.29	1.39
Lean (per cent of neck bones)	30.9	26.2	24.2
Bone (per cent of neck bones)	68.5	72.6	75.5
Trim—(Per cent of carcass)	8.87	9.21	10.34
Leaf Fat—(Per cent of carcass)	2.80	2.85	2.36
Total Carcass—			
Lean (per cent of carcass).....	42.9	44.0	44.3
Fat (per cent of carcass).....	39.9	37.8	35.5
Skin (per cent of carcass).....	5.0	5.5	6.0
Bone (per cent of carcass).....	12.2	12.7	14.2

Carcass Measurements Were as Follows:

Carcass measurement results are expressed in inches.

	Type B. "Chuffy."	Type C. "Intermediate."	Type D. "Rangy."
1. Snout to poll.....	9.1	9.3	10.2
2. Snout to first thoracic vertebra.....	17.0	16.9	17.9
3. Snout to rear toe.....	66.1	66.7	69.7
4. Poll to root of tail.....	38.1	40.5	41.1
5. First thoracic vertebra to root of tail.....	29.6	31.5	32.2
6. First thoracic vertebra to aitch bone.....	27.5	28.5	28.5
7. Depth through chest including fat.....	14.2	14.4	14.5

PACKER MERGER CASE AT CHICAGO.

Continuation of the hearing on the Armour-Morris packer merger will be held in Chicago on November 6, it was announced at the close of the sessions held in Washington last week. The government practically ended the introduction of evidence into the case, but will be given an opportunity to complete its arguments with the opening of the Chicago hearing.

Argentine Beef Exports at a Standstill

A situation which almost equals panic has developed among cattle raisers of Argentina, following the recent decision of American and British packers to stop buying cattle for export pending a ruling on the new minimum price law. A meeting of producers was called at once to consider what action should be taken, according to reports from Buenos Aires.

The decision of packers, forced upon them by the new law, holds up the biggest industry in Argentina. Disastrous effects are feared unless some settlement can be reached. Outside of the British and American firms, there are no packing houses in the country with export facilities, and the cattle raisers are seemingly helpless.

The new legislation provides a minimum price for all grades of cattle. The purpose of the legislation is to afford all stock raisers an equal opportunity, regardless of where they are situated.

Packers have informed the government that their action is not a retaliatory measure and is no way a boycott. They informed officials that it is impossible for them to operate except at a loss under the provisions of the new legislation.

Press Behind Cattlemen.

The united press of Argentina is behind the cattle raisers, and heads of some of the stockmen's organizations have called on the industry to stand firm against the "foreign meat trust." The packers say that they will not resume buying until the government devises a relief from the law, which they characterize as "impracticable, uneconomic and unconstitutional."

Effects of the situation began to be felt at once when shipments of thousands of cattle ordinarily arriving in Buenos Aires for slaughter and export practically ceased. Shipments were halted by the Livestock Consigners' Association, which has telegraphed notice to cattle raisers in order to prevent overloading of the Buenos Aires stockyards.

Minister of Agriculture La Breton has announced that the commission is ready to study any complaints against the law

which set forth reasons of a fundamental nature for its modification.

U. S. Prices to Rise.

Higher prices for cattle in the United States will result from the controversy in the Argentine, Everett C. Brown, president of the National Livestock Exchange, declared recently.

An increase in the demand for export of American cattle will follow the South American trouble, he said, adding that it would be most welcome to American cattle raisers. If European markets have to depend almost entirely upon the United States for beef and pork products, higher prices will be certain to follow, he declared.

Mr. Brown said that the new law in Argentina is a "foolish and impossible" piece of legislation which "must have come from some of the La Follettes, Magnus Johnsons and Brookharts of South America." He declared that the law indicates another example of political interference in business.

ASK ARGENTINE LAW REPEAL.

An unofficial committee of stock raisers, which for more than a year has been serving as contact between the government and the cattle industry, on October 24 sent a formal petition to the minister of agriculture to find some solution for the deadlock between the packers and stock raisers which is resulting from the American and British packers' suspension of their export business.

The committee reminded the minister that it had informed the government several months ago that the proposed minimum price law was unsound economically and unworkable. It says that the law was designed to raise the prices paid to cattle producers, but it has had a counter result, producing complete paralysis.

The committee suggests that if the minister is not able to find a solution for the present difficulty, which is urgently necessary, that the government take steps to have the minimum price law repealed immediately.

TRADE GLEANINGS.

The Lamar Cotton Oil Co., Paris, Tex., has increased the capital from \$120,000 to \$165,000.

The Ladonia Cotton Oil Co., Ladonia, Tex., has increased its capital from \$50,000 to \$150,000.

The Carolina Lime Co., Charleston, S. C., has recently been incorporated by H. M. Hutchinson and others.

W. G. Howser, Chelan, Wis., has recently started important changes and improvements in his slaughter house.

The Virginia-Carolina Fertilizer Co., Arcadia, Fla., has been organized by W. G. Moffat and George Gaskin.

The Greenwald Packing Co., Baltimore, Md., has opened a meat market in the Alagia building, Elkton, Md.

The Gainsville Oil Mill, Gainsville, Tex., has been incorporated with a capital of \$100,000 by J. C. Whaley and others.

The Hildebrand Provision Co., 3616 Clark avenue, Cleveland, O., will soon construct a new plant at a cost of about \$80,000.

The Dixie Packing Co., Mobile, Ala., has been incorporated with a capital of \$100,000 by P. F. McGovern, H. L. Richardson and others.

The Reading Abattoir Co., Pine street, Reading, Pa., will shortly erect a new packing plant at an estimated cost of about \$25,000.

The Lamesa Cotton Oil Co., Lamesa, Tex., has been organized with a capital of \$25,000 by O. W. Jones, C. S. McCormick and others.

The Springfield Packing Co., Springfield, Mo., has been organized recently with a capital of \$100,000, most of the stock being owned by Missouri farmers.

The Wilmington Oil & Fertilizer Co., Wilmington, N. C., has been incorporated with a capital of \$200,000 by Oscar and Horace Pearsall and others.

The Famous Sausage Co., 903 59th street, Chicago, Ill., has been incorporated with a capital of \$100,000 by W. F. Pochowski, S. J. Orlowski, J. A. Lasecki and others.

The Sullivan Packing Co. of Detroit, Mich., has declared its usual quarterly dividend of 2 per cent on the preferred stock of the company, payable November 1, 1923, to the stockholders of record October 20, 1923.

The Spur Cotton Oil Mill and the Citizens Gin & Power Co., Spur, Tex., have been purchased by C. M. Francis and C. L. Widney, J. B. Overton and others, and will be brought under the management of the Jayton Cotton Oil Co., Stamford, Tex.

EVAPORATORS for Animal Products

Most of the evaporators installed in packing houses, glue works, rendering plants and soap factories are Swenson's. Repeat orders are evidence of the fine results obtained from Swenson units for concentrating all kinds of animal product liquors.

We build various types for any capacity.
Send for Bulletin E-122.

Study the Trend of Hog Prices

Just what the relation is between the
supply and demand figures of hogs and
their price movements is something that
many packers, as well as others, would
like to know. Therefore the work that
the U. S. Department of Agriculture is
doing is of great value both now and in
the future.

Among the important projects which
statisticians of the department now have
under way is one designed to furnish a
method of presenting statistics of supply
and demand which will make it easy to
determine the significance of these sta-
tistics as indicators of current price con-
ditions and price conditions of the imme-
diate future.

Price changes do not exactly coincide
in time with changes in underlying supply
and demand conditions. Weeks and per-
haps months may elapse before a shortage
or an oversupply of any farm commodity
is reflected in a change in its price.

The department is attempting from a
study of price, production and business sta-
tistics to determine what is the normal
"lag" in the case of leading agricultural
products between changes in the supply
and demand conditions and changes in
price. Results already attained indicate
that the effort will be successful if carried
on with persistence and care.

Studies of supply and demand conditions
and price movements in the case of hogs
have shown that certain demand and sup-
ply figures anticipate the price movements
several months in advance with remark-
able uniformity. Investigation into price
movements in other lines is expected to
show similar uniformity. Feeder cattle
prices are now being examined from this
point of view. When supply and demand
data for all leading farm commodities have
been gathered, and their relationship to
prices worked out, department statisti-
cians will have a scientific basis to fur-
nish the producer and packer for his use
in making estimates of future price con-
ditions.

The scientific basis of estimating will be
presented graphically and will furnish a
condensed picture of years of past ex-
perience.

Forecasts made on the bases of the curves
represented on this graph should enable
producers to increase or limit their output
well in advance of price changes on which
they now have to rely for guidance. The
advantage to the livestock and meat indus-
try and other phases of agriculture as a
whole would consist in quicker adjust-
ments of supply to probable demand, as a
result of which prices would fluctuate less
widely.

Why Join the Master Butchers?

Twelve reasons why every meat retailer
in the United States should join the United
Master Butchers have recently been drawn
up by National Treasurer Charles Schuck
of the Association, and they were printed
in a recent issue of THE NATIONAL
PROVISIONER. They are worth while
reading by all retailers, for Mr. Schuck
has put the case of the United Master
Butchers in a forceful and practical light.

To summarize these reasons is the pur-
pose at present. The United Master Butch-
ers as the voice of the meat retailers gains
for them recognition and co-operation of
the government. This enables the Associa-
tion to aid in preparation and passage of
beneficial legislation on meat.

It makes possible the development of
better methods in accounting and in sales-
manship. Further, the Association enables
the retailer to understand the problems
of other elements in the meat business and
to bring about more co-operation in the
industry.

Through co-operative insurance the in-
dividual retailer is helped to protect him-
self against loss. Finally as a social insti-
tution the United Master Butchers of
America offers a chance for the growth
of friendship that is, as Mr. Schuck has
stated, priceless.

New Institute Committees

The work of any organization depends
greatly upon the men who have to carry
it on. The Institute of American Meat
Packers has always been fortunate in this
regard and never more so than in the per-
sonnel of new committees which has been
announced recently.

The founding of the Institute and the
putting of it on its feet was the work of
far-sighted leaders in the packing industry
who were right in their belief that it would
take but a few years until the whole indus-
try would co-operate in increasing its effi-
ciency and public service.

This year many of the committees are
headed by new men, and on looking over
the list it seems certain that the high
standard of activity and service to the
industry that characterized the committee
chairmen of the last year will be upheld by
those who are to have charge this year.

With the extension of the scope of the
Institute through the new educational
work that is being carried on and the re-
search that is being started, it ought to
result in great achievements by the end
of the terms of office of the present chair-
men. They are assured of the best wishes
of their colleagues in the industry and the
cordial cooperation that has so far marked
the successful career of the Institute.

PRACTICAL POINTS FOR THE TRADE

(Contents of THE NATIONAL PROVISIONER are copyrighted and matter on these pages may not be reprinted except by permission.)

Trouble in Curing Bellies

Curing troubles are common with the packer, whether it is bacon, hams or sausage. There is much to learn to overcome them. The formula must be right, the temperatures must be watched, and there are other points to remember. But the chief thing to remember is cleanliness and care in handling. Without these rules and formulas are useless.

A small packer in the West has had a lot of S. P. bellies spoil on his hands. For a long time his cure was successful, but with a change of help his troubles began. The chances are that the new man was not as careful as his predecessor, or that he did not understand the value of cleanliness and care in handling.

In curing bellies the overhauling is very important as well as all the other directions. This inquirer writes as follows:

Editor The National Provisioner:

The purpose of this letter is for some idea or suggestions in regard to the trouble we are having in the preparing of our cured meats, especially bacon.

This company has been in operation a trifle over three years, and in that time we have cured our bacon in vats with prepared pickle, salt, sugar, etc., and have met with excellent success with this process. However, we found it necessary to make a change in this department by putting in charge a new man.

The past few weeks we have had considerable trouble and loss on account of this bacon being sour, and not showing the sour until it was smoked. We often find a part on the piece of bacon will be sweet and the other portion sour. This bacon when out will be gassy and sour, and the appearance on the outside will be a dull gray color, instead of being bright, as formerly.

We have been unable to eradicate this trouble, and cannot understand why part of this bacon in vat will be good and the balance in the above mentioned condition. We know you can give us some good ideas and suggestions, and would appreciate your ideas on the manner in which to eliminate this loss.

The past few weeks we have had to tank a considerable amount of this bacon, figuring it was beyond redemption and unfit to use. We trust you will give us an early reply, as our stock of this bacon at present is rather heavy.

The Important Points.

It is imperative that product for curing be placed in cure as quickly as possible after chilling, and not allowed to reach a temperature above 38 degrees, the effective curing temperature.

Hooks must never be inserted in the lean meat, as incisions made leave pockets in which soaking water will lodge, and which become sour in smoking. If hooks are used in handling bellies, they should be inserted just under the skin at the shoulder end. However, hooks should never be used on high-grade product.

When using the thermometer, it should be inserted from the shoulder end toward the flank, for the reason that the pocket made by using this instrument will fill with soaking water, and unless water

drains out in the smoke house it will sour or discolor the product. If the thermometer is used as described, these pockets will have free drainage.

Curing Pickle Formula.

A good curing pickle formula is as follows:

To 100 gallons finished pickle:

15 lbs. sugar, 5 lbs. 4 oz. nitrate of soda or saltpetre, about 250 lbs. salt (as required to make strength 70 degrees on standard salometer at 35 to 38 degrees temperature).

For making pickle this packer should have a small tierce or vat cut down to the bilge in which to mix and sterilize the salt, sugar and saltpetre, also a curing pickle mixture and chilling vat for each kind of pickle used. These vats may be piped for refrigeration and carefully measured to determine capacity. Be sure to figure displacement of refrigerating piping, brackets and plugs when measuring the vats.

The dry curing ingredients, salt sugar and saltpetre are to be placed in the sterilizing vessel and dissolved in 100 degrees plain brine, and thoroughly boiled. This insures thorough mixing and at the same time sterilizes the mixture.

When the solution has been thoroughly boiled, strain through cheese cloth and pour or gravitate into the mixing and chilling vat, and add plain pickle and water to bring the finished pickle to the desired strength. Violent stirring will be necessary to thoroughly mix the ingredients. This may be done manually with a paddle, or by air.

All S. P. bellies are to be overhauled at 3 days of age, 10 days of age and 18 days of age.

If curing pickle drains from the meat, due to leaky containers or otherwise, new pickle should be placed on the product, reduced to the strength of pickle on similar meat at the same age.

Smoking Bacon and Hams

Many inquiries have been received by THE NATIONAL PROVISIONER on the subject of smoking methods for cured meats. In the issue of August 18 full directions for soaking and smoking S. P. meats were published, together with a summer smoking schedule for all products, giving hours in smoke and approximate shrinkage. A table of practice in wrapping meats also was given.

If you did not see this article—if not, why not?—write to THE NATIONAL PROVISIONER, Old Colony Bldg, Chicago, and get a copy of it.

Rendering Dead Animals

A small butcher in a Western state desires information concerning the rendering of dead animals and the making of a good grade of dog food. He says:

Editor The National Provisioner:

I have two 500-gallon tanks and render all my offal and scraps. I also buy refuse, such as dead animals, etc. My biggest trouble seems to be that my grease is too dark and contains too much moisture. I would like to know: How long to cook? How much steam pressure? How to settle stuff in tanks? How long to let settle? Care of grease, etc.?

I have an inquiry for dog feed and would like to get some recipes and information as to what kind of feed to mix together to agree with young dogs of all kinds.

We do all our own butchering, make our own lunch goods. I have just installed this plant and realize I have a lot to learn. Any information you can give me will be appreciated.

One expert answers these questions as follows:

Tank should not be filled more than three-quarters full, and the length of time for cooking depends largely upon size of tank and the quantity in the tank. However, four to seven hours is the usual time required, at 40 lbs. steam pressure.

How long to settle stuff in tanks? About one hour.

Skim off and run the grease into clean second-hand barrels. White grease should run less than 3% acids. Brown grease usually runs 15% to 20% acids, according to the season of the year.

When whole carcasses of dead animals are tanked they must be thoroughly cut up, running the knife into the ham, shoulder and belly deep enough and carelessly, to allow the steam to penetrate the thicker portions of the carcass, otherwise an uncooked tank will result.

For dog feed we would recommend cooking livers, lights and a few hog rinds, which will act as a binder, using just enough water to cover the meats in the cooking kettle.

When meats are cooked, remove from cooking kettle and allow meat liquid to remain in the kettle.

Then grind the meats through ¼-inch plate of hashing machine and place ground cooked meats back in the kettle in the meat liquid, and add a good quantity of corn meal.

Then allow to cook again for at least 15 minutes at a boiling point, and stir the product constantly during the cooking process.

It can then be placed in 1-lb. tin molds and taken to the cooler to chill.

WANTED: A CELLAR BOSS.

Packers who are seeking to strengthen their operating departments will find this a splendid time to do so. Not in years have so many high-class men been available, and at reasonable terms. Try a "Want" ad. in THE NATIONAL PROVISIONER and see what quick results you get.

Country Pork Sausage

A small killer in Eastern Pennsylvania writes:

Editor The National Provisioner:

We kill a few hogs and make sausage. We would like to make a better grade of breakfast and country pork sausage. Can you give us directions?

The inquirer should read the September 29 issue of THE NATIONAL PROVISIONER, page 26, and adopt the meat and spice formula as shown in that article for fancy breakfast sausage.

If they are not equipped with a 9-knife rocker, they surely must have a hashing machine. The most important feature is the selection of the meats and the careful mixing of the spices. The formula given in the article referred to should answer their purpose for fancy breakfast sausage.

In regard to country pork sausage, it is recommended that the inquirer adopt the following formula per 100 lbs. of meat:

80 lbs. strictly fresh pork trimmings, 85% lean and 15% fat.

20 lbs. fresh boneless beef.

Spices and seasoning:

2 lb. 8 oz. salt.

10 oz. ground white pepper.

4 oz. granulated sugar.

1 oz. ground nutmeg.

1/2 oz. ground ginger.

2 oz. nitrate of soda or saltpetre.

[See article in issue of September 29 for directions for handling. Reprints of this article may be had upon application to THE NATIONAL PROVISIONER, Old Colony Bldg., Chicago, upon application accompanied by a 2-cent stamp.]

What are the yields in cutting carcass beef, New York or Philadelphia style, compared to the Chicago method? Ask THE BLUE BOOK, the "Packer's Encyclopedia."

Production and Sale of Casings

brought to the maximum with my Sales and Service combination.

Mould in Sausage

Do you have trouble with the color of your sausage?

Does it show green rings or gray spots?

Mould IN sausage is caused by poor materials or careless handling. Mould ON sausage is a surface condition and can be prevented by proper handling.

Write to THE NATIONAL PROVISIONER, Old Colony Bldg., Chicago, for directions for preventing mould in sausage. Send a 2-cent stamp for the reprint on "Discoloration in Sausage."

THE HUMAN MOTOR.

An automobile must have care—so must your body.

Compare them and note the similarity.

Good gas—Good food, including meat.

Clean spark plugs—Clean teeth.

Clear head lights—Good eyes.

Tuning and adjusting—Outdoor exercise.

Full air pressure—Good posture.

No carbon—No constipation.

Keep clean and oiled—Frequent baths and plenty of sleep.

Good mixture—Balanced ration—vegetables, fruit, etc.

Don't choke engine—Chew food thoroughly.

Strong steering gears—Strong will power.

Humming motor—Cheerfulness.

Keep radiator filled—Drink plenty of water.

Good brakes—Self control and self reliance.

A hot spark—Ambition.

Good bearings—Perseverance.

Good lubrication—Fair play and tolerance.

Strong axles and frame—Stamina.

Well balanced mechanism—Even temper.

Rolls easy—Plays well.

Good hill climber—Hard worker.

The horn does not increase the power and is disagreeable to others—Don't boast.

A tiny speck in the current bearer can kill the engine—A tiny germ may cause fatal illness.

A skillful and careful driver will avoid all dangers and complete his journey safe and sound—A strong character will be master of his body and deliver his soul undefiled at the end of life's journey.

Lard Storage Temperatures

An inquiry from a wholesale and retail meat dealer in the Southeast is as follows:

Editor The National Provisioner:

Will it do to let lard stand in a refrigerator three or four months where the temperature stands 10 to 15 degrees below freezing?

Emphatically No. Lard carried at 10 to 15 degrees below freezing, when taken out of this temperature, would sweat and turn rancid very rapidly.

Lard can be carried in a cooler at a temperature of 38 to 40 degrees for months with good results.

BEST PACKER HOG TYPES.

(Continued from page 23.)

Where Rangy Type Excels.

Rangy type, when compared to intermediate type, was greater in length by—

- 1 in. in face.
- 1 in. in head and neck.
- 3 in. from snout to rear toe.
- 1/2 in. from poll to root of tail.
- 3/4 in. from first rib to root of tail.
- The same from first rib to aitch bone.
- The same through chest (fat included).
- 3/4 in. through chest (fat not included).
- 1/2 in. less fat on back.
- The same depth of fat on belly.
- 1/2 in. more bone on fore shank.
- 1 1/2 in. from top of back bone to end of fore toe.
- 1 1/2 in. from root of tail to rear toe.
- 1 3/4 in. from aitch bone to end of rear toe.

Get rid of odors

How much money do you spend in a year trying to get rid of the odors in your plant?

Have you been successful?

If not, why not try the Henderson-Haggard Chlorine Process, which is installed under Positive Guarantee to eliminate odors.

It is safe, simple, cheap.

W. J. SPRINGBORN
Consulting Sanitary Expert

40 Rector St. New York

Koch Tinned Wire Sausage Form

Patented March 8th, 1921

Develops a Highly Profitable Use for

Beef Bladders and Beef Back Ends

This form enables the sausagemaker to use Beef Bladders and Back Ends for making Bologna, Ham Sausage, Cooked Salami, Mortadella, or any sausage usually stuffed in Beef Bungs. It saves tying and breakage and produces a superior package, uniform in size and shape, and particularly adapted to machine slicing.

Seasonal Trend in Prices of Hogs and Cured Pork Products Wholesale at Chicago

This chart in THE NATIONAL PROVISIONER MARKET SERVICE shows the current price levels in representative cured pork products. It shows the general upward trend of hogs, lard, ribs and hams for the last few months. But with September hog prices experienced a sharp recession which has not yet been overcome.

PROVISIONS AND LARD

WEEKLY REVIEW

All articles under this head are quoted by the barrel, except lard, which is quoted by the hundredweight in tierces, pork and beef by the barrel or tierce and hogs by the hundredweight.

Prices Higher—Spot Lard Strong—Distribution Excellent—Hog Movement Liberal—Stocks Not Accumulating.

The provision market has shown a rather interesting development during the week with a further sharp break in hogs under the large receipts and a relatively strong market in product. The spread between hogs and product has widened sharply particularly on the basis of the lard price, and on the basis of the action of the October lard. Later deliveries were comparatively steady, both in lard and in meats.

The action of the hog market was a very decided surprise to the trade in view of the demand for product, small stocks, and action of nearby prices. At the low point hogs were down this week about 2c a pound from the level of early September. During that time the price of October lard has gained about 1c a pound, and ribs about ¼c a pound.

The relative price for product has evidently been based on the demand for, and liberal shipments of product into distribution. The continued movement of product is reflected in the Chicago figures showing the distribution from Chicago.

Last week the shipments from Chicago were 20,000,000 lbs. of cut meats, 26,000,000 lbs. of fresh meats, and 15,400,000 lbs. of lard. The shipments of meats from Chicago the past year have been 266,000,000 lbs. more than the preceding year, and shipments of lard 146,000 lbs. more. While this increased movement has been the result of increased packing, yet the product has disappeared and not piled up on the trade.

Big Movement of Hogs.

On the other hand the movement of hogs keeps very large, the receipts at the seven principal markets last week were 594,000 against 375,000 last year, and the packing for the week was 807,000, against 577,000 last year, and since March 1 was 25,796,000, against 19,449,000 a year ago.

German Fat Demand Persistent.

The export movement was quite large, the exports of lard for the week being 23,586,000 lbs., against 19,651,000 lbs. last year, and exports of meats 27,061,000 lbs., against 10,591,000 lbs. last year. The exports of lard included 11,213,000 lbs. to Germany, and the total exports to the Continent were nearly 20,000,000 lbs. out of a total of 23,586,000 lbs.

Of the exports of meats 18,100,000 lbs. were to British markets and most of the balance to the Continent. The persistent demand for fats from Germany takes the pressure off the market, and this demand is so persistent that there is no evidence of any pressure at any point.

Lard Produced and Consumed.

Analysis of the production and distribu-

tion of lard for the first eight months of the calendar year showed the very interesting conclusions as follows:

	8 mos., 1923.	8 mos., 1922.
Stocks Jan. 1.....	48,808,000	47,541,000
Production, 8 months.....	1,326,943,000	1,038,821,000
Total supply.....	1,375,751,000	1,086,362,000
Exports, 8 months.....	719,938,000	511,723,000
Stocks Sept. 1.....	115,824,000	119,755,000
Total exports and stocks, Sept. 1.....	835,762,000	631,478,000
Balance, domestic use.....	539,989,000	454,884,000

The apparent consumption of lard per month this year has been 67,500,000 lbs., against 56,600,000 lbs. per month last year. The consumption this year is the equivalent of about 169,000 bbls. of 400 lbs., per month, which makes a very favorable comparison with the cotton oil distribution, and with the consumption of cottonseed oil shows the enormous use of fats in this country. Exports of lard were 130,000,000 lbs. more for the eight months than the domestic consumption, with the exports at the rate of 180,000 bbls. of 400-lbs. per month.

The Government report of the movement of livestock for September and for nine months shows the continuation of the enormous slaughter. The figures for the sixty-seven markets make total receipts this year of 39,273,000 hogs, against 30,960,000 hogs last year; cattle and calves 16,417,000, against 16,030,000 last year; and sheep 15,219,000, against 15,250,000 last year. The local slaughter of sheep for the period was 7,677,000 against 7,901,000 last year, hogs 25,467,000 against 20,097,000, and cattle and calves 9,532,000 against 9,001,000.

There has been some little talk of comparatively light weights of livestock this year compared with previous years, but the figures at the leading points do not carry this claim out. The Chicago average for the second week in October was 254

lbs., against 243 lbs. last year; Kansas City 205 lbs., against 208 lbs.; Omaha, 272 lbs., against 277 lbs.; St. Paul 229 lbs., against 214 lbs.

Storage Holdings Reduced.

The details of the cold storage report for October 1, 1923, give the total supply of all meats in store of 723,266,000 lbs., against 589,188,000 lbs. last year, and 774,001,000 lbs. the five-year average for October 1st. Compared with September 1, 1923, there was a reduction of 145,000,000 lbs., and compared with the September 1 five-year average, a reduction of 192,000,000 lbs.

Notwithstanding the enormous packing this year the present stock is 51,000,000 less than the October 1 average. The stock of lard was 13,000,000 lbs. less than the October 1 average, and 52,000,000 lbs. less than the September 1 average. In addition to the decrease in the stock of meats and lard, stocks of frozen fish were 15,000,000 lbs. less than the September 15 average.

PORK—Demand was reported extremely active and the market was strong with mess at New York \$25.50@26, family nominal, short clears \$27@32. At Chicago mess pork was quotable at \$22.

LARD—Demand continues active and the market strong, with prime western New York 13.70@13.80c, middle western 13.60@13.70c; New York City 13½c; refined to the continent, 15c; South American 15¼c; Brazil kegs 16¼c; compound, New York, carlots, 13½@13¾c. At Chicago regular lard in round lots was quoted .25 over Oct., loose lard .05 over Oct., and leaf lard Oct. price.

BEEF—Demand was good and the market strong with mess at New York \$16@17, packet \$17@18, family \$20@21, extra India mess \$31@33; No. 1 canned corn beef \$2.35, No. 2, \$4; pickled tongues, per bbl., \$55@65, nominal.

BRITISH PROVISION MARKET.

(Special Report to The National Provisioner.)
Liverpool, England, October 13, 1923.

There has been no marked change in the bacon market this week. There has been an improved demand for Danish at the lower prices and the undertone is generally steadier. Irish is in short supply.

American bacon is not getting much encouragement from buyers who operate sparingly and the volume of trade is too light for the fair supply on the market. Under these circumstances holders are easy sellers, and general concessions in prices have been made in order to help sales.

Hams are meeting with a slightly better demand, and there is some steadying in prices on the decline. Shoulders are in very limited sale.

Lard on spot is firmer in sympathy with the improved Chicago advices, and supplies of refined are showing signs of getting into smaller compass.

FATS AND GREASE EXPORTS.

Exports of fats and greases from New York from October 1 to October 24, 1923, are reported unofficially as follows: Lard, 44,273,687 lbs.; tallow, 693,600 lbs.; greases, 4,951,200 lbs.; and stearine, 200,000 lbs.

Your Cheapest Fuel?

Are you keeping track of your fuel costs?

Have you ever compared the cost of coal with other fuel, such as oil?

THE NATIONAL PROVISIONER has published a handy chart which will tell you at a glance whether it is cheaper for you to burn oil instead of coal. A well-known packing house master mechanic says this is one of the best charts he has ever seen.

You can get a reprint of this chart, with directions for its use, by sending your name and address, with a 2-cent stamp, to The Editor, THE NATIONAL PROVISIONER, Old Colony Bldg., Chicago, Ill.

How To Avoid Paying Government Penalties

You know that water for sterilizing must be the exact temperature prescribed by the government. You know, too, that water too hot spoils the meat—wastes fuel besides; and that water too cool means paying governmental penalties.

But let a man do his best at watching thermometers and turning valves, the water will get too hot or too cool—and yours is the loss.

Then why not eliminate the human element by applying Powers Automatic Regulators to your Sterilizing Tanks? They're always on the job—never lay down, never forget, never make a mistake. They prevent all the losses that creep in with man-control of temperature.

For closed or open tanks, hog scalding vats, etc. The thermostat bulb is connected with valve by flexible tube. Easily installed. Relieves men from duty of constantly testing temperatures and regulating steam supply.

Test a Powers Regulator 30 Days Free!

We will send you one with simple instructions for cutting it in. Use it—check it up. If you are not satisfied, send it back and we will cancel the charge.

(2) Source: Bureau of Foreign and Domestic Commerce, Dept. of Commerce.

MEAT EXPORTS IN SEPTEMBER.

Total meat exports for September, 1923, amounted to 95,356,921 lbs., valued at \$13,520,489, compared with 66,045,583 lbs. for September, 1922, with a value of \$10,819,159. Most of the individual products showed an increase for September over the same month in 1922. Those products showing an increase were fresh beef, pickled beef, fresh pork, hams and shoulders, bacon, pickled pork, oleo oil, and lard. The products which showed a decrease were canned beef, sausage, neutral, compound and margarin.

For the nine months ending September, 1923, all products showed an increase as compared with the same period in 1922. The only products which showed a decrease were pickled pork, canned beef, oleo oil and compound.

Meat exports for September with comparisons for September, 1922, are reported as follows:

	Month of September 1922.	1923.
Total meats, lbs.	66,045,583	95,356,921
Value	\$10,819,159	\$13,520,489
Animal oils and fats	\$9,499,856	\$12,677,564
Beef, fresh, lbs.	228,430	270,092
Value	\$31,495	\$39,229
Beef, pickled, etc., lbs.	2,840,933	2,853,988
Value	\$228,242	\$255,576
Pork, fresh, lbs.	2,198,367	3,214,722
Value	\$342,313	\$493,218
Hams and shoulders, lbs.	20,591,900	31,749,440
Value	\$3,971,387	\$5,123,039
Bacon, lbs.	30,447,613	45,161,353
Value	\$4,851,988	\$5,983,233
Pork, pickled, lbs.	4,008,769	5,157,972
Value	\$479,607	\$591,834
Beef, canned, lbs.	287,531	132,158
Value	\$60,910	\$29,666
Sausage, lbs.	1,598,367	1,563,880
Value	\$62,146	\$26,312
Oleo oil, lbs.	8,333,409	8,468,314
Value	\$906,922	\$931,445
Lard, lbs.	61,119,667	83,630,201
Value	\$7,337,567	\$10,536,879
Neutral lard, lbs.	1,598,367	1,563,880
Value	\$210,533	\$206,309
Lard compounds (animal fats), lbs.	1,324,648	499,231
Value	\$153,225	\$57,864
Margarine (animal fats), lbs.	188,781	113,670
Value	\$29,524	\$18,483

Meat exports for the nine months ended September, 1923, with comparisons for the same period in 1922 are reported as follows:

	9 months ended Sept. 1922.	1923.
Total meats, lbs.	581,108,482	755,208,237
Value	\$99,602,399	\$110,318,581
Animal oils and fats	\$86,938,202	\$117,278,258
Beef, fresh, lbs.	2,532,508	2,694,328
Value	\$372,660	\$415,610
Beef, pickled, etc., lbs.	29,604,832	17,490,881
Value	\$1,841,254	\$1,790,981
Pork, fresh, lbs.	13,388,419	24,208,546
Value	\$2,111,429	\$4,995,989
Hams and shoulders, lbs.	216,130,318	284,389,032
Value	\$44,086,582	\$45,228,076
Bacon, lbs.	247,332,299	323,450,957
Value	\$36,904,163	\$42,709,431

TALLOW, STEARINE, GREASE AND SOAP

WEEKLY REVIEW

TALLOW.—The market for tallow has been rather quiet but rather firm, with a fair amount of business on the basis of 7½¢ for extra, ex-plant, New York. Offerings were moderate, and buyers were not over-enthusiastic and sentiment on the whole was more mixed. The strength in cottonseed oil was a helpful feature. In the west prices continued firm on the better grades with edible at Chicago 9½¢ asked, prime packer 8¼¢ paid and 8½¢ asked, No. 1 at 7¼¢@7½¢, and No. 2, 5½¢@6¢. At Liverpool Australian tallow was unchanged for the week with choice at 40s 9d, and good mixed at 39s 6d.

There was no auction at London this week, while prices at the last auction for mutton were 41s 6d @ 42s 6d, and for beef 41s @ 42s 6d.

At New York special loose was 7½¢ nominal, extra 7½¢ nominal, with rumors of some sales at 8¢ delivered, while edible was 9¢@10¢ nominal.

STEARINE.—The market was dull and weak with offerings pressing for sale, with some business at New York at 12¼¢ for oleo, or ¼¢ decline, with offerings free at that figure, and indications pointing to next sales at 12¢ or less. At Chicago oleo was quiet and heavy, with 12¢ generally asked.

OLEO OIL.—The market was much firmer, with a better demand and light offerings, and extra New York 14½¢ nominal, medium 11½¢, and lower grades 10½¢. At Chicago extra was 13¢@13½¢.

SEE PAGE 37 FOR LATER MARKETS.

LARD OIL.—The market was quite firm, reflecting the situation in pure lard, but operations continued of a hand-to-mouth sort. At New York edible was quoted at \$1.10 per gallon, extra winter 12½¢@12¾¢ per lb.; extra No. 1, 11¼¢@12¢; No. 1 at 10¼¢@11¢, and No. 2 at 10¼¢@10½¢.

NEATFOOT OIL.—A firm undertone prevailed, with demand steady, though limited to small-sized lots. At New York pure was quoted at 13¼¢@14¢, extra at 11¢@11½¢, No. 1 at 10¢, and cold pressed, 17½¢@17¾¢.

GREASES.—A very steady market prevailed the past week, with the steadiness in tallow and the strength in some of the oils. Demand was rather limited, and buyers slow in following any upturns in prices. Choice white grease was in a rather firm position, while soapers' interest in the other grades was reported as limited. At Chicago choice white grease was available at 9¢, although some were holding for 9¼¢, with A white 7¼¢@8¢, and B white 6½¢@7¢, with yellow bringing 6¢@6½¢, according to acid tests, house 5¼¢@6¢ asked, and brown 5½¢ paid. At New York yellow was 6½¢@7¢ nominal, choice house 6½¢@7¢, white 7¼¢@8¢, and choice white, 10½¢@11¢.

TO ENFORCE FAIR MARKET SERVICE.

An inquiry has been instituted by the Secretary of Agriculture, through the Packers' and Stockyards' Administration, into charges made by the Farmers' Union Livestock Commission and the Producers' Commission Association of Kansas City, both co-operative livestock commission organizations, that various old-line market agencies doing a livestock commission business at the Kansas City Stockyards and deal-

ers in livestock operating there have been using unfair and unjustly discriminatory practices to the disadvantage of the complainants.

The specific complaint is that these agencies and dealers are failing and refusing to buy from or sell to the two co-operative associations of producers or to enter into any business relations with them. At the same time, it is said, these various firms and dealers have been doing business freely among themselves.

The Department of Agriculture is setting out to determine the extent, if any, to which the Packers' and Stockyards' Act has been violated by the market agencies and dealers for the purpose of issuing such orders as may be warranted by the facts. Notice has been given to all concerned that a hearing before an examiner of the department will be held in the assembly room of the Kansas City Livestock Exchange beginning on October 23, 1923, at 10:30 a. m.

Packinghouse By-Products Markets

Blood.

Chicago, October 25, 1923.

Blood has been in strong hands this week and the demand has been light. But prices have been firm with a sale at \$4.70 at river points. Ideas of the sellers are about \$4.85 Chicago.

Unit ammonia.
Ground, 10 to 12% ammonia.....\$4.50@4.60
Crushed and unground.....4.30@4.40

Digester Hog Tankage Materials.

The demand for digester materials has been light this week with offerings a little more plentiful. The ideas of the buyers are about 50¢ a unit lower than those of sellers.

Unit ammonia.
Ground, 10 to 12% ammonia.....\$3.50@4.00
Unground, 10 to 11% ammonia.....3.60@3.75
Unground, 7 to 9% ammonia.....3.25@3.50

Fertilizer Tankage Materials.

This market is very quiet, as it has been for some time, because of it being between seasons.

Unit ammonia.
High grade, ground, 10-11% ammonia....\$3.00@3.10
Lower grade, ground, 6-9% ammonia....2.75@2.90
Medium to high grade, unground.....2.50@2.75
Low grade and country rend., unground. 2.25@2.40
Hoof meal.....3.00@3.10
Liquid stock.....2.85@3.00
Grinding hoofs, pigs' toes, dry.....34.00@36.00

Bone Meals.

As for a long time bone meals have been a drug on the market at the following quotations:

Per ton.
Raw bone meal.....\$28.00@30.00
Steamed, ground.....22.00@24.00
Steamed, unground.....18.00@20.00

Cracklings.

Cracklings are easy this week. Buyers are out of the market temporarily as the business in finished product is light.

Per ton.
Pork, according to grease and quality...\$65.00@75.00
Beef, according to grease and quality...55.00@60.00

Bones, Horns and Hoofs.

Hoofs are stronger than last week, but on the whole the market for bones, horns and hoofs is the same as last week.

Per ton.
No. 1 horns.....\$275.00@300.00
No. 2 horns.....225.00@250.00
No. 3 horns.....150.00@200.00
Culls.....33.00@35.00
Hoofs, black and striped, unsorted...33.00@35.00
Hoofs, white, unsorted.....45.00@55.00
Round shin bones, unsorted, heavies. 85.00@95.00
Round shin bones, unsorted, lights...70.00@80.00
Flat shin bones, unsorted, heavies...65.00@70.00
Flat shin bones, unsorted, lights...55.00@60.00
Thigh bones, unsorted, heavies.....85.00@95.00
Thigh bones, unsorted, lights.....70.00@80.00

Glue and Gelatin Stock.

There has not been much change in this market this week. Jaws, skulls and

knuckles sold at \$35.00 and sinews and pizzles at \$19.00.

Per ton.
Calf stock.....\$28.00@30.00
Edible pig skin strips.....60.00@65.00
Rejected manufacturing bones.....48.00@50.00
Horn piths.....23.00@25.00
Cattle jaws, skulls and knuckles.....33.00@35.00
Junk and hotel kitchen bones.....24.00@26.00
Sinews, pizzles and hide trimmings...16.00@18.00

Hog Hair.

Recent quotations follow, per lb., delivered Chicago basis: Field and coil dried, winter, 3¼¢; coil dried, summer, 2½¢; processed, summer, 6¢; processed, winter, 7¢.

Pig Skin Strips.

Outlet has been narrow at around 4¼¢ for No. 1. Demand very narrow.

EASTERN FERTILIZER MARKETS.

(Special Report to The National Provisioner.)

New York, October 24, 1923.—One or two small lots of ground tankage were sold at \$3.75 and 10¢ f. o. b. New York, and the sellers are asking about this figure, but as there are no buyers a concession will have to be made unless conditions change within the next week.

The feeding buyers seem to have disappeared entirely as far as both tankage and cracklings are concerned. Fifty per cent cracklings sold at \$1.10 per unit and no doubt the next sales will be under that figure. The 60% grade is being held at about \$1.25 with no buyers.

South American ground dried blood is being quoted at \$4.10 and tankage at \$4.10 and 10¢ c. i. f. the ports, and there is very little business being done either north or south in these two materials.

Sulphate of ammonia continues weak and a great many re-sale offerings have been thrown on the market. Nitrate of soda remains steady and very little interest is being shown in these materials.

COTTON OIL SITUATION ANALYZED.

An analysis of the cottonseed oil situation for the month of August and September, 1923, with comparisons for the same months in 1922, based on the federal census reports, taking in the seed, the crude oil and the refined oil statistics, has been prepared by the Aspegren & Co., and makes a very interesting study. It is as follows:

MOVEMENT OF COTTONSEED AT CRUDE OIL MILLS.

	—Tons received—	1923-24.	1922-23.
On hand beginning of season....	12,786	13,168	
August	159,219	160,470	
September	547,824	674,766	
Total	719,628	788,404	
	—Tons crushed—	1923-24.	1922-23.
August	52,453	52,245	
September	247,846	327,096	
Total	300,298	379,341	
	—Increase or decrease—	1923-24.	1922-23.

*Estimated seed receipts at crude mills season 1923-24..... 3,965,400 3,244,960
On hand beginning of season..... 12,786 13,168
Total

This month the estimate has been revised on basis of the latest government cotton report of 11,015,000 bales figuring 900 pounds of seed to a bale and 80 per cent to be crushed. If subsequent ginning reports should not bear out the above figures, we will change our estimate accordingly.

NEW LINK-BELT EXECUTIVE.

Richard W. Yerkes, formerly general manager of the Link-Belt Company's Philadelphia plant, has been appointed treasurer of the Link-Belt Company, succeeding B. A. Gayman. Mr. Gayman was selected by Charles Piez, president of the Link-Belt Company, to head the newly acquired Meese & Gottfried Company of San Francisco. The new company will operate under the name Link-Belt Meese & Gottfried Company, San Francisco. Mr. Yerkes will be located at the Link-Belt Company's general offices at 910 South Michigan avenue, Chicago.

Statistics of Cottonseed and Products

Cottonseed received, crushed, and on hand, and cottonseed products manufactured, shipped out, on hand, and exported covering the two-month period ending September 30, 1923 and 1922, are reported by the U. S. Bureau of the Census as follows:

Cottonseed received, crushed, and on hand (tons):

	Received at mills* Aug. 1 to Sept. 30, 1923.	Crushed Aug. 1 to Sept. 30, 1923.	On hand at mills Sept. 30, 1923.
United States	706,842	379,341	419,330
Alabama	22,104	23,074	12,817
Arkansas	9,509	5,362	4,731
Georgia	32,390	15,642	17,921

	1,428		750		1,340

*Includes 1,032,229 and 3,148,615 pounds held by refining and manufacturing establishments and 1,170,910 and 12,947,080 pounds in transit to refineries and consumers Aug. 1, 1923, and Sept. 30, 1923, respectively.

†Includes 3,783,784 and 2,201,008 pounds held by refiners, brokers, agents, and warehousemen at places other than refineries and manufacturing establishments and 8,670,531 and 4,252,041 pounds in transit to manufacturers of lard substitute, oleomargarine, soap, etc., Aug. 1, 1923, and Sept. 30, 1923, respectively.

*Produced from 56,589,773 pounds crude oil.
Exports of cottonseed products for two months ending September 30: Crude oil, 1923, not available; 1922, 197,451 lbs. Refined oil, 1923, not available; 1922, 5,210,622 lbs. Cake and meal, 1923, not available; 1922, 42,972 tons. Linters, 1923, 7,567 running bales; 1922, 7,392 running bales.

VEGETABLE OILS

WEEKLY REVIEW

THE NATIONAL PROVISIONER is Official Organ of the Interstate Cottonseed Crushers' Association, the Texas Cottonseed Crushers' Association, South Carolina Cottonseed Crushers' Association, the Georgia Cottonseed Crushers' Association and the Mississippi Cottonseed Crushers' Association.

Market Strong — New Season's Highs Reached—Crude and Seed Sparingly Offered—Cotton and Lard Strength Factors—Cash Trade Moderate.

A more liberal daily turnover, and an advance into new high ground for the season featured cotton oil futures trading on the New York Produce Exchange during the past week. Outside interest showed a tendency to broaden, and the market gradually worked its way upward, on an array of very strong factors. In some quarters the strength in the market was laid to the tight position prevailing in the October delivery. But to those working closely in touch with the market it was not difficult to prove that fundamental conditions, and not an October squeeze, if it may be called such, was behind the advance.

Advance Not Due to October Squeeze.

In the first place, the short interest in October had proven, in the main, to be refiners who were delivering the oil, which was being readily taken by the longs. And at no time was the current delivery so tight that the shorts could not readily get under cover. In fact, private settlements were made on several hundred barrels, and the long interest showed no disposition whatsoever to bid up prices. For one of

the leading refiners was selling a few hundred barrels of October daily, making fresh commitments, and was shipping the oil from the refinery to the New York market, and making deliveries. All told, about 12,000 bbls. were delivered, and the small, scattered commission house interest was readily evened up.

On the other hand, seed prices in the south were extremely tight, with farmers showing no disposition whatsoever to sell at times, while crude oil was back to the season's best levels, at 9½¢ bid and 10¢ asked in all sections. The lard market developed considerable strength, and went into new high ground for the season, while cotton prices continued their recent action, and also made new highs.

Special Government Report.

The Government announced that on Nov. 2 it would issue a cotton crop report, due to pressure from the south, and this was readily taken as favorable to prices, as it was calculated generally that this special report would indicate a crop somewhat smaller than the October estimate.

At the same time, there were private estimates ranging from 9,800,000 to 10,280,000 bales, the former by Arthur Shelton, and the latter by the National Ginners' Association. These were sufficiently low to create considerable speculative buying, and notwithstanding profit taking and refiners' selling, to maintain the greater portion of the upturn. Reports from refining sources

continued to indicate a very poor quality of seed from this crop, while refining losses were reported running at from nine to as high as thirteen per cent.

Cash Lard a Scarce Article.

It can be readily seen that more than the October situation was behind the market, and notwithstanding a more moderate cash trade, the situation was sufficiently strong to overcome reports of slow cash business. Another feature to which much attention is given is the repeated claim that the larger refiners, with small stocks on hand, are advising the trade to buy in a hand-to-mouth way, some going so far as to predict lower cash prices next month, which in itself is sufficient to make for the holding off policy recently noted. Under heavy export clearances, and an immense domestic demand, cash lard has become a scarce article, affording compound a better competitive basis, and the indications are that this condition will not be overcome for some weeks.

The technical position of the market is not as strong as it has been recently, as the short interest has covered, and in many cases gone long, while the relatively high levels of the distant months have, to some extent at least, discounted the crop conditions. At the same time, it must be remembered that the scarcity of spot oil has and is reducing consumption somewhat compared with last year, and it is questionable whether or not the losses in distribu-

tion during September and October will be made up later on.

October consumption is expected to run 200,000 bbls., against nearly 300,000 last year, while at the same time, it appears more than probable that even should the final cotton crop prove to be a few hundred thousand bales larger than last year, the crush of oil will not be much, if any, larger than last season owing to the seed situation.

Cotton Census Report.

	1923.	1922.
COTTONSEED—		
Stock, Aug. 1, 1923.	12,000	13,000
Received at mills, 2 months.	707,000	775,000

Total sales 13,700 barrels.

SEE PAGE 37 FOR LATER MARKETS.

COCOANUT OIL.—Demand was rather quiet, and the market was easier, with sales reported of several cars at 8½¢ coast, November shipment; re-sales, tanks, coast, were also reported at 8¢, with but limited interest shown at the decline. Copra was steady, though nominal, at 5¼¢ New York, and around 5¢ coast. At New York Ceylon type in barrels was quoted at 9½¢@9¾¢; tanks, 8½¢@8¼¢; Cochin, bbls., New York, 10¢@10¼¢; edible, bbls., New York, 10½¢@10¾¢; tanks, coast, 8¢@8¼¢.

SOYA BEAN OIL.—A better demand was in evidence and with re-sale oil absorbed and fresh offerings limited, the market displayed a firmer undertone. Oriental prices were firmer, and helped the market. At New York crude in barrels was quoted at 11¢@11¼¢; blown, 15½¢@15¾¢; tanks, coast and tanks, New York, 9½¢@9¾¢.

PEANUT OIL.—Lack of supplies continues to make for limited trade, and firmness in prices; crude oil is purely nominal, while refined, barrels, New York, is 15¢@15½¢.

CORN OIL.—With offerings limited and crude cotton oil sharply higher, corn oil advanced rapidly, selling at 9½¢ f. o. b. western production points, an advance of ¼¢ over late last week. Refined corn oil stocks are small and prices firm. At New York crude in barrels was 10½¢@11¢; tanks, Chicago 9½¢; refined, barrels, New York, 13½¢@13¾¢, and cases, 13.38¢.

PALM OIL.—Limited offerings of spot oil, and a firm market, featured this commodity. Firmness in tallow and buying of Lagos by tin plate manufacturers created a tighter position, forcing values

above soapers' ideas. At New York Lagos spot and shipment was quoted at 7½¢; Niger spot, 7½¢@7¼¢; shipment, 7¼¢.

PALM KERNEL OIL.—Demand was moderate and the market steady with prices at New York around 9c, immediate shipment.

SESAME OIL.—A more active inquiry is reported for this, and sales of some good-sized lots, nearby delivery, were reported. Supplies on the spot are limited, and held at 12½¢, barrels, car lots, with small lots around 13¼¢.

COTTONSEED OIL.—Demand moderate, market strong, P. S. Y. spot barrels, New York, 12½¢; crude, all sections, 9¢@10¢; refined, barrels, small lots, 13@13¼¢.

SOUTHERN MARKETS.

New Orleans.

(Special Wire to The National Provisioner.)

New Orleans, La., Oct. 25, 1923.—Crude cottonseed is strong and advancing. Limited sales in the valley this week at 10 cents. Majority of the mills are holding for higher prices. This necessary on account of seed values. Refined oil is firm with inquiries increasing. 36 per cent meal is \$42.50; 41 per cent meal, \$46.40; 43 per cent meal, \$47.40; loose hulls, \$14.75; sacked hulls, \$18.65 per ton delivered.

Dallas.

(Special Wire to The National Provisioner.)

Dallas, Tex., Oct. 25, 1923.—Crude cottonseed oil for immediate and prompt shipment is quoted at 9½ to 9¾¢ bid, 10 cents asked. The market is very quiet with practically no sales. Cracked cake and meal are very slow at \$41.00 for November, \$41.50 December, January \$42.00. Slab is \$37.00 to \$38.00 f. o. b. mills. Hulls are 9c to 11c on location. Linters first cut are 11 cents; second cut, 6 cents. Mill run, 6 to 8c with very few sales. Mills are waiting for the government estimate. There is lowering temperature in North Texas.

CHEMICAL AND SOAP SUPPLIES.

(Special Report to The National Provisioner.)

New York, October 22.—Latest quotations on chemicals and soapmakers' supplies are as follows:

Seventy-six per cent caustic soda, \$3.60 @3.70 per 100 lbs.; 98% powdered caustic soda, 4¼¢@4½¢ lb.; 58% carbonate of soda, 2@2¼¢ lb.

Clarified palm oil, in casks of 2,000 lbs., 7½¢@7¾¢ lb.; olive oil foots, 8¼¢@8½¢ lb.; East India Cochin cocoanut oil, 13½¢@14¢ lb.; Cochin grade cocoanut oil, domestic, 11@11¼¢ lb.; Ceylon grade cocoanut oil, 10@10¼¢ lb.

Prime summer yellow cottonseed oil, 13¼¢@13½¢ lb.; soya bean oil, 10¼¢@11¼¢ lb.; linseed oil, 95¢@1.00 gal.; crude corn oil, in bbls., 11@11¼¢ lb.; peanut oil, in bbls., New York, deodorized, 15@15½¢ lb.; peanut oil, in tanks, f. o. b. mills, 13c lb.; extra tallow, 7½¢ lb.; dynamite glycerine, nominal, 16½¢ lb.; saponified glycerine, nominal, 12½¢ lb.; crude soap glycerine, nominal, 11c lb.; chemically pure glycerine, nominal, 17c lb.; prime packers' grease, nominal, 6¼¢ lb.

VEGETABLE OIL MARKET IN ITALY.

There has been no material change in the Italian market for vegetable oils during the last few months. Good olive oil can be had in abundance at moderate prices, it is reported, while the demand for seed oils, both those imported and those manufactured locally, is weak and competition between manufacturers and importers is keen; recent quotations taken from the bulletin of the Chamber of Commerce of Milan are as follows:

	Per 100 kilos.
Riviera virgin olive oil.....	825 to 850
Farl olive oil.....	650 to 675
Refined peanut oil.....	615 to 650
Sesame No. 1.....	600 to 620
Refined soya bean oil.....	600 to 620

Cottonseed oil is not included, being still excluded from the market by the high rate of duty in comparison with other oils. An important firm that formerly imported cottonseed oil in large quantities reports that the price level in the United States is now so high that even if the duty were the same as that on soya bean oil, cottonseed oil could not be sold in Italy.

Deodorized soya bean oil tends to decline in price after the sudden increase that took place during the month of April, when it was quoted at 53 pounds sterling per long ton, c.i.f. Italian ports. The price at the present time is approximately £46.15.0.

Sudden fluctuations of character have a very bad effect on the trade owing to the risk of heavy loss that must be incurred by anyone who attempts to make purchases in advance. In spite of this decline soya bean oil is still unable to compete with seed oils manufactured locally, for the duty, manufacturing tax and cost of customs clearance adds about 135 lire per 100 kilos, which brings the cost of the importer to approximately 600 lire.

The local manufacturers are selling edible sesame oil at about 590 lire per 100 kilos, barrel included, delivered at the place of business of the purchaser, and in some cases, even below this figure. Such being the case, imports are still on a reduced scale.

GERMAN VEGETABLE OIL INDUSTRY.

Conditions in the German vegetable oil crushing industry are becoming more unfavorable every day. Millers have plenty of oilseeds on hand, but can dispose of

only very small amounts of finished products, since margarine and allied manufacturers are very slow in taking oils. This condition, already in existence for several months past, has of late been aggravated, first, by the gigantic depreciation of the mark and the ensuing difficulty of buying raw materials abroad, and second, by the growing scarcity of money among manufacturers and the diminished purchasing power of consumers.

While it is true that most Hamburg vegetable oil millers are still working, some of them are operating on short time and all of them must store most of their finished products in their warehouses. In order to alleviate this condition and to shut out foreign competition, as from July 15, 1923, the German Government has placed a temporary embargo on the importation of vegetable oils and fats, with the exception of castor oil and old contracts, in order to protect German oil millers.

As a consequence it is said that world market prices for oilseeds and oils, in particular for coconut butter, have gone down considerably. Copra is still being imported regularly, although in very limited amounts. In general the impression prevails in vegetable oil circles of Hamburg that business conditions can hardly become more difficult than at present.

The following imports of oilseeds, oils and oil products at Hamburg and Bremen were received during June, 1923:

	Bremen metric tons.	Hamburg. tons.
Peanuts (groundnuts), bags.....	57,959	1,423
Palmkernels, etc., bags.....	160,711	3,174
Palmkernel meal, tons.....	8,550
Soya beans, bags.....	124,346
Copra	3,844
Copra cake, bags.....	20,604
Coconuts, bags	9,941
Linseed, bags	81,735
Linseed oil, bbls.....	3,898
Rapeseed, bags	144,331
Oilcake, n. s. s., cases.....	57,752
Oilcake meal, bags.....	2,085
Cottonseed	1,032
Sesame seed	302

THE WEEK'S CLOSING MARKETS

FRIDAY'S CLOSINGS.

Provisions.

Hog products are very strong and at new season's highs, influenced mainly by continuance of an immense domestic demand for meats and decreasing lard stocks, and notwithstanding hog receipts which still run 25 per cent above year ago.

Cottonseed Oil.

Cottonseed oil is active and strong at new season's highs. There is general buying scarcity. Offerings are influenced by comparatively small ginnings to date, which are advancing crude cottonseed oil and seed. Southeast crude cottonseed oil sold at 10c, Texas seed \$52.00 delivered. October deliveries amount to 11,000 barrels and thus far all have been taken. The shorts are covering. Cash trade is limited. Private cotton estimates are averaging 10,250,000 bales.

Quotations on cottonseed oil at Friday noon were: October, \$12.35@12.75; November \$11.63@11.65; December, \$11.34@11.37; January, \$11.30@11.32; March, \$11.37@11.39; May, \$11.50@11.58.

Tallow.

Extra tallow, 7½c.

Oleo Oil and Stearine.

Oleo stearine is quoted at 12¼c; extra oleo oil, 14¾c.

FRIDAY'S GENERAL MARKETS.

New York, October 26, 1923.—Spot lard at New York, prime western, \$13.90@14.00; Middle West, \$13.75@11.85; city steam, \$13.58; refined, continent, \$15.00; South American, \$15.00; Brazil, kegs, \$16.00; compound, \$13.25@13.50.

Liverpool Provision Markets.

Liverpool, October 26, 1923.—(By Cable.)—Quotations today: Shoulders, square, 67s; shoulders, New York, 66s; shoulders, picnics, 56s; hams, long cut, 96s; hams, American cut, 96s; bacon, Cumberland cut, 82s; bacon, short backs, 75s; bacon, Wiltshire, 83s; bellies, clear, 69s; Australian tallow, 39s. 6d. to 40s. 6d.; spot lard, 79s.

Hull Oil Market.

Hull, October 26, 1923.—(By Cable.)—Refined cottonseed oil, 41s. 6d.; crude cottonseed oil, 36s. 6d.

ARGENTINE BEEF EXPORTS.

Cabled reports of Argentine exports of beef of the week up to October 19, 1923, show exports from that country were as follows: To England, 137,493 quarters; to the Continent, 96,173 quarters; to other ports, none.

Exports for the previous week were: To England, 17,945 quarters; to the Continent, 19,213 quarters; to other ports, none.

CANADIAN BACON EXPORTS GROW.

(Special Correspondence of The National Provisioner.)

Montreal, Can., October 25, 1923.—Canada's exports of bacon to Great Britain rose almost 3,000,000 pounds during the first nine months of this year. For the same period of 1922 there were 70,988,000 pounds of Canadian bacon shipped to the British market, while this year the corresponding figures went up to 72,934,000 pounds.

The same comparison regarding bacon exports to the United States show a small falling off, according to the returns published by the Markets' Intelligence Service of the Dominion Department of Agriculture. But these figures are negligible, compared to those relating to the English market.

The total exports of Canadian bacon to the United States for the first nine months of 1923 were only 114,000 pounds.

MEAT PACKING COURSE A SUCCESS.

The courses in the new Institute of Meat Packing, recently started by the Institute of American Meat Packers and the University of Chicago for the purpose of giving practical training to men already in the industry and a four-year course for young men entering the industry, are proving a great success. Many of the courses are already full and many people have written to ask about the correspondence courses which are soon to begin.

In the course on "Superintendency" the lectures this week and next are being given by W. J. McDonald, assistant supervising engineer of Swift & Company, and they deal with the highly important subject of "Boiler Room Practice." Last week C. W. Evans of the motive power department of Armour & Company spoke on some questions of motive power calculation.

A complete report is being kept of all lectures delivered and preparation is being made to have them arranged for the correspondence so that all men in the packing industry in the country will have an opportunity to have the same access to the information they contain.

MEAT SUPPLIES AT NEW YORK.

Receipts of western dressed meats and local slaughter under federal inspection for New York City, N. Y., are officially reported for the week ending October 20, 1923, with comparisons, as follows:

	Week ending Oct. 20, 1923.	Previous week, 1922.	Cor. 1922.
Western dressed meats:			
Steers, carcasses	9,014½	8,516½	8,207
Cows, carcasses	801	820	781
Bulls, carcasses	294	386½	203
Veal, carcasses	11,641	11,616	11,932
Hogs and pigs	4,738	4,738	4,738
Lambs, carcasses	27,232	28,520	20,988
Mutton, carcasses	6,637	4,254	6,787
Beef cuts, lbs.	218,588	92,956	72,922
Pork cuts, lbs.	1,200,238	909,055	833,132
Local slaughter, Federal inspection:			
Cattle	10,780	10,795	11,154
Calves	12,768	12,676	12,924
Hogs	58,853	48,983	50,212
Sheep	43,930	42,566	43,739

MEAT SUPPLIES AT BOSTON.

Receipts of western dressed meats and slaughter under federal and city inspection at Boston, Mass., are officially reported as follows for the week ending October 20, 1923, with comparisons:

	Week ending Oct. 20, 1923.	Previous week, 1922.	Cor. 1922.
Western dressed meats:			
Steers, carcasses	2,840	1,875	2,863
Cows, carcasses	1,847	1,461	2,081
Bulls, carcasses	28	33	53
Veal, carcasses	1,340	905	872
Lambs, carcasses	15,163	10,470	13,130
Mutton, carcasses	289	81	706
Pork, lbs.	160,436	127,419	225,595
Local slaughters:			
Cattle	2,855	2,381	1,743
Calves	2,469	2,313	727
Hogs	21,180	14,811	12,544
Sheep	7,062	6,690	686

MEAT SUPPLIES AT PHILADELPHIA.

Receipts of western dressed meats and local slaughter under city and federal inspection at Philadelphia, Pa., are officially reported as follows for the week ending October 20, 1923, with comparisons:

	Week ending Oct. 20, 1923.	Previous week, 1922.	Cor. 1922.
Western dressed meats:			
Steers, carcasses	2,483	2,181	2,583
Cows, carcasses	705	393	677
Bulls, carcasses	165	84	161
Veal, carcasses	977	1,743	1,569
Lambs, carcasses	6,573	6,041	6,991
Mutton, carcasses	944	742	1,741
Pork, lbs.	343,372	316,217	160,128
Local slaughters:			
Cattle	2,623	2,417	2,203
Calves	2,108	2,110	2,259
Hogs	24,707	24,875	21,137
Sheep	5,805	5,406	6,756

NEW YORK LIVESTOCK.

ST. LOUIS.

(Reported by U. S. Bureau of Agricultural Economics.)
National Stock Yards, Ill., Oct. 25.

CATTLE—The outstanding features of the current week were the generous offering of yearling steers and the abundant supply of canners and cutters, minor features being the meager supply of fat light yearlings, fat beef cows and western grass steers. Compared with one week ago, good and choice beef steers, western steers, beef cows, canners and cutters, bologna bulls and stocker steers sold steady. Common and medium beef steers closed steady to 25c lower; fat light yearlings 25c higher; grass heifers 50c lower; light vealers \$1.50@1.75 lower; top matured steers and light yearlings, \$11.25; long yearlings, \$12.00; bulk of good to choice steers, \$10.25@11.75.

HOGS—Liberal receipts amounting to approximately 90,000 in four days brought about a further reduction of porcine values, principally on light weights and pigs. Choice medium weight and heavy butchers are little changed, probably 5@10c lower, while light hogs are 15@25c lower, and pigs and light lights unevenly 25@75c lower; packing sows 25@40c lower, top today at \$7.60 compared with \$7.65 a week ago; bulk of medium weight and heavy butchers today brought \$7.35@7.50.

SHEEP—A moderate supply and active buying on packer account resulted in material advances on fat lambs and yearlings which are fully 50c higher than one week ago, cull lambs and sheep being held at steady levels. Packers paid \$12.75 for best lambs today and \$12.25@12.50 for the bulk; culls mostly \$8.00; fat light ewes \$6.00.

LOUISVILLE.

(Special Letter to The National Provisioner.)
Louisville, Ky., Oct. 24, 1923.

CATTLE—With cattle receipts considerably lighter this week than the previous two weeks, the market showed more activity with the desirable kinds fully steady, but on the medium and plainer classes it was a continued slow and draggy market although a better clearance was affected than for the past two weeks. The best light butcher steers and heifers sold readily, plainer kinds slow. Canner trade weak, \$2.00, with strong weights up to \$2.25, and cutters at \$2.50. Bulls held steady. The heavy steer trade was slow with few prime ripe kinds offered; one load of good heavy steers sold for feeders at \$7.50. The best stockers and feeders also found a better outlet, common light trashy kinds a drag on the market.

Cattle quotations follow: Prime heavy steers, \$8.00@8.50; heavy shipping steers, \$6.50@8.00; fat heifers, \$4.00@7.50; fat cows, \$3.50@5.50; common to good cows, \$2.50@3.50; cutters, \$2.25@2.50; canners, \$2.00; bulls, \$3.00@4.50; feeders, \$4.50@6.50; stockers, \$2.50@6.00.

HOGS—Hog arrivals the first half of the week numbered close to 7,000 with a large number of loads billed direct to local packers. The demand is active for the choice heavy hogs but the light end is in poor demand, in fact, the same conditions prevail at all other places. Prices today showed a quarter gain. Top hogs, 200 lbs. up, \$7.60; 165 to 200 lbs., \$7.25; 120 to 165 lbs., \$6.35; 90 to 120 lbs., \$5.75; 90 lbs. down, \$5.25; throwouts, \$5.75 down. The outlook is for a good active trade the balance of the week.

Calf supply the first half of the week totaled over 1,200. The market has held steady so far this week, top veals \$9.50, with a slow and lower trade on medium and common calves.

SHEEP—Lamb values showed further loss opening day of the week, with top grades 50c off, others unchanged. No change has been made since Monday. Top lambs \$10.50, seconds \$6.50. Best fat sheep \$3.00@5.00, bucks \$3.00 down.

LIVE STOCK MARKETS

CHICAGO.

(Reported by U. S. Bureau of Agricultural Economics.)
U. S. Yards, Chicago, Ill., Oct. 25.

CATTLE—Better grades of fed steers, yearlings and desirable beef heifers reacted modestly upward during the week under review. Yearlings reflected the most upturn and practically all grades of youngsters sold actively. Upturns amounted to 25@40c. Matured steers of value to sell above \$10.00 shared the advance, but a feature of the matured steer trade was the instability of short-fed weighty bullocks, many loads turning sluggishly at \$7.50@9.50.

Instances were cited where some of these sold rather sharply below their original cost as feeders a few months ago. Even good to choice weighty steers were easily congested, these lacking the competition tendered handyweights and yearlings of comparable finish.

Best matured steers rested at \$12.45, and today 950-lb. yearlings sold upward to \$12.35. Western grass steers sold at the season's low time. She stock regained losses earlier in the week and closed about steady, bulls gained 10@25c, and veal calves lost \$1.25@1.50.

HOGS—Following recent sharp declines in swine values, only minor price shifts were recorded in prices for the last week. Light weights scored a 5@10c advance and both medium and heavy weight offerings declined 10@15c. Packing sows quotations were equal to those current a week ago. Best weighty butchers for the week sold at \$7.70. Good and choice medium and heavy-weight offerings cashed within a narrow spread. Receipts ran lighter than a week ago and shippers took approximately the same number, 29,000 head.

SHEEP—Lighter receipts coupled with active shipping demand late in the week forced values upward on all killing classes. Fat lambs showed the maximum advance, best selling today at \$13.25, which figure is about 50c higher than similar kinds last Thursday. Although fat sheep did not advance as much as did best lambs, a strong undertone is evident and sales mostly 25@50c higher. Feeding lamb values did not follow fat kinds and best feeders today are around 50c lower than at the close of last Thursday's market.

KANSAS CITY.

(Reported by U. S. Bureau of Agricultural Economics.)
Kansas City, Mo., Oct. 25, 1923.

CATTLE—Handyweight corn-fed steers and yearlings were again the center of attraction during the past week's trading, and such kinds sold at about steady prices. All other killing steers have been discriminated against and are showing sharp declines as compared with the week previous.

The market has been flooded with short-fed steers and western grassers with the quality unusually plain. The bulk of the western offerings show 35@50c losses with the exception of low-priced grass steers which are around 25c lower. Best weighty fed beefs scored \$11.65, while prime long yearlings cashed at \$11.85@12.00.

She stock trade was dull with uneven declines of 15@50c; in-between grades of cows and grass heifers off most. Bulls held around steady. Veal calves 50c@\$.1.00 lower with heavies and medium grades \$1.00@1.50 off.

HOGS—Receipts of hogs are considerably in excess of the week previous, but prices show very little change, due largely to the broad demand by killers at prevailing low price levels. Shippers have taken comparatively few during the week with orders confined to the lighter weights. Choice weighty butchers have been scarce

and the bulk of this class sold today at \$7.20@7.25. Packing sows are 15@25c higher, going from \$6.25@6.50.

SHEEP—With moderate receipts, including a large percentage of feeding stock, fat lamb prices show a gradual daily reaction and closing levels are 50@65c higher than the close of the week previous. The \$13.00 lamb made its reappearance today after an absence of ten days. Offerings have been largely range lambs with bulk of killing kinds going from \$12.25@12.75. Aged sheep were scarce and sold 25c higher; best western ewes made \$6.00, with bulk from \$5.50@5.75.

OMAHA.

(Reported by U. S. Bureau of Agricultural Economics.)
Omaha, Neb., Oct. 25, 1923.

CATTLE—Weakness featured the market for fed steers the early part of the week but after Tuesday moderate receipts accounted for a touch of strength and the earlier declines were practically wiped out, particularly on light steers and yearlings. Heavy steers showed a loss for the week of around 25c.

The market displayed a good tone on yearlings throughout the week, which kind sold up to \$10.90. This price was also paid for medium weight fed steers. Quality of range offerings has been rather plain and prices have tended lower, values ruling weak to 25c lower for the week. Best grass steers reached \$7.35.

HOGS—Improvement was noted in hogs. The quality of the week's run of hogs over recent weeks, with a somewhat larger percentage of butchers and a smaller showing of poorly finished kinds and packing grades. Prices have advanced 15@25c on butchers while mixed packing and heavy packing sows are around 40c higher than on Thursday of last week. On today's market bulk found outlet at \$6.65@7.10 with top price of \$7.25.

SHEEP—The week's trade on killing classes has been fairly active on most days

with an upward trend to values, lambs showing an advance of 50@75c as compared with a week ago, while sheep are around 25c higher. Western lambs reached \$13.00 on Thursday, the high price for the week, while natives sold up to \$12.50, and fed clippers made \$12.25. Light ewes sold at \$5.75.

ST. JOSEPH.

(Special Letter to The National Provisioner.)

South St. Joseph, Mo., October 23.

CATTLE—Cattle receipts for two days this week were around 9,000. Bulk of the supply came from western states, though there was a fair showing of fed steers and yearlings from native territory. Most natives were of the short-fed variety, but there were also a few long-feds. Western offerings were largely from Kansas. There was a little unevenness to the trade, with better grades of natives and western and fed yearlings showing little change, but medium and common kinds are weak to 25c lower.

Native steers sold mostly \$8.00@10.25, with two lots on the yearlings order at \$11.50. Kansas steers sold \$5.00@8.75 and Oklahomas \$5.50@5.60. Mixed yearlings ranged \$8.25@9.35. The market for cows and heifers is mostly 15@25c lower for the period. Western cows ranged \$3.00@4.80, and a few choice fed natives sold up to \$6.00. Canners and cutters sold mostly \$2.25@3.25. Grass heifers sold \$4.50@6.50 and fed offerings up to \$9.00. Bulls held a steady basis, with most sales \$3.50@4.25, and calves show no change, choice veals going at \$10.50.

There was a fair showing of stocker and feeder cattle and the market is steady to a shade lower. Sales ranged \$5.00@6.75. Stock cows ranged \$3.00@3.50 and heifers \$4.50@5.50.

HOGS—Hog receipts for two days this week show a large increase both here and at the five western markets. With increased supplies there was a slow tone to the trade and values worked 10@20c lower than last week's close. Today's top was \$7.10 and bulk of sales \$6.25@7.00. Saturday's top was \$7.15 and bulk of sales \$6.40

LIVESTOCK PRICES AT LEADING MARKETS.

Following are livestock prices at five leading Western markets on Thursday, October 25, as reported to THE NATIONAL PROVISIONER by leased wire of the Bureau of Agricultural Economics, U. S. Department of Agriculture:

Ewes, canner and cull.	1.00@ 3.75	1.00@ 3.50	1.00@ 3.50	1.00@ 3.50	1.50@ 3.00

@7.10. Packing sows sold down to \$5.25, with few sales above \$6.00. Stags sold \$5.00@5.25.

SHEEP—Around 8,000 sheep were received during the two days, practically all from western ranges. Monday's market held steady on all classes with best western lambs at \$12.35 and ewes \$5.75. Feeders sold \$11.50@11.90. Supplies were light Tuesday and lambs were quoted strong to 25c higher. Best here brought \$12.25, though choice kinds were quoted at \$12.50 or better. Fed clips sold at \$11.75 Tuesday and western ewes \$5.75, same as the previous day. Yearlings and wethers were scarce.

SIOUX CITY.

(Special Letter to The National Provisioner.)

Sioux City, Ia., October 24, 1923.

CATTLE—The markets all along the line are developing better tones and material strength in prices as the week progresses. Congestion that prevailed in the killing cattle division last week has been well cleared and movement again appears back to normal with prices strengthening. Movement of fed cattle was light early in the week but since the turn toward strength in prices a very good showing of finished cattle has been on hand.

The week was featured by the sale of prime long-fed yearlings at \$12.25 on Wednesday, equaling the highest price reported for yearlings in the West that day. It was the highest price paid at the Sioux City yards during the present calendar month. Many sales of prime cattle of all weights were made at around \$11.00@11.50. Fair to good grades were fairly numerous at around \$9.50@10.50.

Movement of common warmed-up steers fell off, doubtless being influenced by last week's break and by the downward course of the corn market. Reports of curtailed feeding because of advanced corn prices have not been as much in evidence the last week as earlier in the season.

Butcher supplies fell off after deluging the market last week. Prices have strengthened fully 25c. Quality is showing improvement but it still is running plain, with the proportion of clean-up grassers liberal. Stockers are stronger but values still are being held close to the lowest levels of the season. Receipts have exceeded requirements the last several weeks.

HOGS—The hog market is gaining strength after recent bad breaks. Receipts continue to run approximately twice as heavy as at this time last year. A liberal proportion continues to run to heavy sows, many of them thin and grassy grades. The proportion of lights is showing increases daily. Such kinds now are at the low end of the range of prices.

ST. PAUL.

(Reported by U. S. Bureau of Agricultural Economics and Minn. Dept. of Agriculture.)

South St. Paul, Minn., Oct. 24, 1923.

CATTLE—Cattle receipts continue liberal and current marketings are practically all grass cattle of the lower grades, only a few grain-fed offerings being included in receipts. Receipts up to mid-week totaled slightly more than 21,000 head compared with actual marketings of 22,396 the corresponding period of last week.

Compared with a week ago current values for the most part are steady to around 25c lower. Range beefs of quality and finish similar to those which sold in last week's trade at \$8.25 were lacking among this week's offerings, best load lot here this week cashing at \$6.50, with bulk between \$5.00 and \$6.00 and commonest kinds as low as \$4.00. Best grain-fat heifers are selling in limited numbers from \$5.00@6.00, best grass-fat cows \$4.50@5.00, with bulk of fat steers stock under \$4.50. The popular price for canners is \$2.00 with cutters selling on up to \$2.75. Bologna bulls weigh-

ing 1,000 lbs. and up are selling largely at \$3.25@3.75.

HOGS—Hog receipts for the first half of the week totaled about 52,000, against 48,000 same period a week ago and 42,000 a year ago. Although some reaction has occurred in the market on recent days, butcher and bacon hogs are still selling around 35@40c lower than a week ago, packing sows 10@25c lower. Bulk of the butcher and bacon hogs ranging for the most part from 150 to 250 lbs. sold today at \$6.65@6.75, packing sows \$6.00@6.25. Pigs sold from \$5.75@6.00.

SHEEP—Native lambs are about steady with a week ago, bulk selling today at \$11.50 with some less closely sorted offerings at \$11.25, culs \$8.00@9.00. Fleishy ewes are selling to packers mostly from \$4.00@5.50.

PACKERS' PURCHASES.

Purchases of livestock by packers at principal centers for the week ending Saturday, Oct. 20, 1923, are reported to The National Provisioner as follows:

CHICAGO.

	Cattle.	Hogs.	Sheep.
Armour & Co.	8,065	19,800	15,287
Swift & Co.	8,652	31,000	21,850
Morris & Co.	5,235	18,900	7,802
Wilson & Co.	7,137	18,100	5,921
Anglo-Amer. Prov. Co.	1,236	8,100

HIDE AND SKIN MARKETS

(SHOE AND LEATHER REPORTER)

Chicago.

PACKER HIDES.—Three killers moved close to 7,000 October heavy Texas steers at 12½¢, a steady level. About 5,000 October natives sold late this week at 15¢. No other movement noted. Killers report limited inquiry today, but state that last general movement indicates wide distribution in small parcels. Natives quoted 15¢; spreads, 17½¢; Texas and butts, 12½¢; Colorados, 11½¢; branded cows, 9½¢; heavy cows, 14¢; lights, 12¢ asked; bulls, 11¢ and brd., 9¢.

SMALL PACKER HIDES.—The local situation appears quiet with killers reported willing to consider bids at 11½¢ for straight run material, brands 2¢ off. Tanners, while not openly expressing views, state that in their opinion business will soon occur at 11¢. Outside lots of September-October small packer native hides are offered at 11¢, and dating to the end of the year by same sellers at 10½¢. Buyers intimate ability to secure October-November kill in some quarters at 10½¢ and December at 10¢, brands usual 2¢ reduction. Stocks the country over are declared to be fairly large in the aggregate. Coast steers, 10½¢; cows, 8½¢ paid and asked.

COUNTRY HIDES.—Stagnation seems to be the order in country hides, locally at least, as there is nothing passing here. Some business is being reported from the outside markets at low levels but for the most part buyers and sellers are deadlocked. Tanners are insisting upon low levels because of their ability to purchase outside packer stock from first salt at levels demanded by country dealers. Their wants likewise are small as operations are being carried on in a hand to mouth way. The tendency to the market appears to be toward easier figures. Holdings locally are moderate but nothing is pressed on the market. Outside parcels are also amply held, many lots dating back considerable. Local sellers intimate they would speculate on choice summer hides at prevailing prices, but that practically every offering from the country contains back dating material. All weight hides are quoted at 8¢ bid and 8½¢ up talked by shippers. Tanners refuse to raise their limits. Heavy hides are quoted at 9¢11¢ for steers here and heavy cows at 8½¢9¢ with the outside usually asked. Heavy cows and butts are quoted at 8¢8½¢ as buyers' views and sellers talk 8½¢9¢. Extremes are listed at 9½¢10½¢ paid for quality and sections with interest of moderate proportions. Branded country hides are quiet and nominal at 7¢7½¢ flat basis and country packers at 8¢9½¢. Bulls sold at 7½¢ today for a car of outside stock; country packer bulls are quoted at 9¢10¢ paid and asked; glues 5½¢6½¢.

CALFSKINS.—Action in skins at present is slow. Buyers apparently are drawing away from the market to watch developments. Holdings of skins in the aggregate are burdensome but appear to be centered in packers' hands. Packer calf last sold at 18½¢. Buyers are of the opinion next business will be at 18¢, but no concrete bids at that figure are named. Sellers intimate they would welcome movement before the week end. One killer previously sold half his October production and the other sellers have the whole month intact. City collectors are getting a few skins oversales and are putting out material today at 17½¢ but receive no encouragement as yet. Traders feel that reductions are a possibility but not a probability at this time. Collectors are not gathering skins very fast. Outside city

calfskins are listed firm at 16½¢17½¢ from first salt as to points and resalted material about 16¢. Country run and mixed city and country skins range at 13½¢15¢. Deacons are quoted at \$1.00@1.10; kipskins are sluggish. City skins sold earlier as previously noted at 15½¢. Packers held rather ample lines of September-October material and while asking 15½¢ are expected to sell at best prices available real soon as they appear to be becoming nervous regarding disposition. Outside skins 11½¢14¢.

MISCELLANEOUS MARKETS.—Dry hides show no change, being quoted 17¢18¢ nominal for all weights. Horse hides continue scarce and wanted at \$4.00@4.25 for ordinary lots. Renderers are held at \$4.50 up. Packer shearlings are scarce and quoted firmly at \$1.20; sheepskins, \$1.50@1.60; lambskins, \$1.55@1.75; dry pelts, 27¢30¢ nominal; pickled skins, \$6.50@8.15 paid; hogskins, 15¢25¢.

New York.

PACKER HIDES.—Two cars of October spready native steers sold late this week at 17½¢ and that further offerings at that figure in current and forward slaughter were not seriously considered by tanners who felt that further recessions would be enforced soon. The above trade was a quarter off from prior business in similar salting. Some interest is manifested in butts with 12¢ now asked, or ½¢ higher and in line with that appreciation paid in Colorados moved at 11¢ earlier in the week. Natives are quoted about 13½¢ paid and 14¢14½¢ asked. Cows 11¢11½¢ last paid; bulls 10½¢10¾¢ nominal.

SMALL PACKER HIDES.—Little new business is reported as buyers have very low set ideas. They feel that all weight cows are not worth over 11¢ and most of them entertain even lower views. Steers quoted 12¢12½¢ nominal. As noted previously some Toronto big packer steers made 15¢.

COUNTRY HIDES.—Very little support is in sight in country stock. Boston buyers are expecting to secure ample lines of material at much lower prices shortly and they are withholding support to watch developments. Southern light stock is steady in tone, about 10¢ flat basis lately paid for middle section lots. Western lights are quoted 10¢10½¢ and Ohio and similar material at 10½¢11¢ asked and paid. There is little call noted for buff weights which are offered as low as 8¢. All weight Eastern country hides are considered top at 8¢ by most buyers.

CALFSKINS.—Recent business reported quietly in three weight N. Y. skins at \$1.60@2.00@2.80@2.85 with kips at \$3.20@4.20 for veals and \$2.70 for buttermilks. The volume of this business could not be learned, but the kipskins involved several cars. Outside skins quoted \$1.25@1.50 range as a basis on lights and country stock sold at \$1.00. Untrimmed material 16½¢17½¢ for cities. Foreign skins are quoted quite firmly.

FOREIGN WET SALTED HIDES.—Since the Argentine government has legislated that minimum cattle prices be paid regardless of quality at originating points, slaughter has virtually ceased in the River Plate district. This accounts for the slow movement and the high prices paid on the material disposed of. Argentine steers topped \$41.00 or 14½¢ landed basis and Montevideo varieties recently sold at \$44.00 or close to 15½¢ basis under present exchange. Cows were recently moved to cost 12½¢ landed but have been advanced in price subsequently to meet the new condition and the dwindling supplies. Type hides have been moderately active,

slaughter not being much impaired by reason of the adverse and uneconomic legislation. About 8,500 type hides, mixed, sold at 10½¢. About 5,000 frigorifico extremes are offered at 12½¢. Common hides, campos and similar range at 7¢9¢ for descriptions. Spot hides are moving slowly but usually at private terms. About 1,200 regular Panamas sold today. Commissary Panamas 12¢ recently. Cubans sold privately.

CENTRAL LEATHER SHOWS DEFICIT.

A deficit of \$3,826,034 after taxes and charges was reported by the Central Leather Company for the quarter ended September 30. This compares with a deficit of \$79,637 in the previous quarter and a surplus of \$758,074, equal to \$2.27 a share on \$33,298,050 stock for the third quarter in 1922.

The profit and loss deficit on September 30 totaled \$7,780,303 as against \$3,954,268 on June 30, 1923, and \$6,764,933 on September 30, 1922. The poor earnings of this company have been discounted on the New York Stock Exchange with the common stock selling at the lowest price of the year.

It is pointed out that most of the larger leather companies have encountered a bad period since the middle of the current year. Few shoe concerns are operating at anywhere near capacity and supplies have been moving only at concessions.

CHICAGO HIDE QUOTATIONS.

(Special Report to The National Provisioner from J. F. Nicolas.)

Chicago, Oct. 27, 1923.—Quotations on hides at Chicago for the week ending Oct. 27, 1923, with comparisons, are as follows:

ICE AND REFRIGERATION

ICE NOTES.

A new cold storage plant will soon be constructed at Zeeland, Mich.

The Birmingham Ice & Cold Storage Co., Birmingham, Ala., has increased its capital to \$85,000.

Anderson & Smith, Greenville, Tenn., expect to have a new cold storage plant in the near future.

A new cold storage plant is to be erected in Schenectady, N. Y., at 129 South Center street, according to reports.

The Grandview Cold Storage Co. has been incorporated at Seattle, Wash., with a capital of \$75,000 to \$125,000.

Theodore E. Donovan, 130 West Main street, Batavia, N. Y., will shortly erect a new cold storage plant at that place.

The city of Port Pierce, Fla., is going to erect a new municipal ice plant with an estimated cost of \$20,000, according to present plans.

The South Scituate Ice Co., Rockland, Mass., has bought the ice business of Wallace Hackett, North Hanover, and will make improvements at once.

The Sewell Meat & Cold Storage Co., Winnemucca, Nev., has been organized by Harvey Sewell and will shortly be operating a new cold storage plant.

The Houston Ice & Cold Storage Co., Houston, Tex., has been purchased by the Houston Ice & Brewing Association and will make additions to their facilities.

REFRIGERATING ENGINEERS MEET.

The American Society of Refrigerating Engineers will hold its nineteenth annual meeting in the Hotel Astor, New York City, on Monday, Tuesday and Wednesday, December 3, 4 and 5, 1923. A large attendance is expected.

MANY ICE CONVENTIONS AHEAD.

Many conventions of ice associations are to be held in the near future. Some of the most important are as follows:

November 1, 2, 3—Western Ice Manufacturers' Association, annual convention, Coates House, Kansas City, Mo.

November 8, 9, 10—Eastern Ice Manufacturers' Association, annual convention, New York City.

November 13-16—National Association of Ice Industries, annual convention, Hotel Winton, Cleveland, Ohio.

December 3-5—American Society Refrigerating Engineers, annual convention, New York City.

December 4, 5—Michigan Ice Industries Association, annual meeting, Hotel Pantlind, Grand Rapids, Mich.

December 5, 6—Arkansas Association of Ice Industries, annual convention, Pine Bluff, Ark.

December 6, 7, 8—Indiana Ice Dealers Assn., Tri-State Ice Mfrs. Assn. and Ken-

tucky Ice Mfrs. Assn. join in holding their respective conventions at Evansville, Ind.

December 6-8—Oklahoma Ice Manufacturers' Association, annual convention, The Lee Huckins Hotel, Oklahoma City, Okla.

December 11-13—Louisiana Ice Manufacturers' Association, annual convention, New Orleans, La.

December 12-15—National Association Practical Refrigerating Engineers, 14th annual convention and exhibition, Hotel Chisca, Memphis, Tenn.

December 18-20—Southwestern Ice Manufacturers' Association, annual convention, Hotel Adolphus, Dallas, Tex.

DAIRY AND EGG STORAGE.

Cold storage holdings of dairy products and eggs in the United States on October 1, 1923, with comparisons ('000s omitted) are reported by the U. S. Bureau of Agricultural Economics as follows:

	Sept. 1, 1923.	5-year avg. 1922.	Oct. 1, 1922.	Oct. 1, 1923.
Butter, creamery.....	102,731	101,976	96,680	96,088
Cheese, American.....	63,960	54,613	49,473	62,485
Cheese, Swiss.....	4,718	4,137	5,766	5,244
Cheese, brick and				
Munster.....	3,235	1,172	842	3,031
Cheese, limburger.....	1,531	1,182	937	1,677
Cheese, all other.....	7,219	9,228	5,906	6,438
Eggs, case.....	9,883	6,343	7,924	8,718
Eggs, frozen.....	37,280	25,946	33,545	43,853

NOTE—These holdings include stocks in both cold storage warehouses and packing house plants. Thousands, i. e., 000 omitted from above tables. Excepting case eggs, all items in terms of pounds.

*Prior to 1920, figures for cured meats included those for meats still in process of cure.

RETAIL FOOD PRICE CHANGES.

An increase of 2 per cent in the retail cost of food in September, 1923, as compared with August, 1923, is shown by a report of the U. S. Bureau of Labor Statistics.

During the month from August 15, 1923, to September 15, 1923, the following articles on which monthly prices are secured increased in price: Fresh eggs, 17 per cent; pork chops, 14 per cent; butter, 6 per cent; lard, 5 per cent; plate beef, 3 per cent; fresh milk and cheese, 2 per cent; rib roast, chuck roast, bacon, ham, lamb, hens, vegetable lard substitute, 1 per cent. Oleomargarine and nut margarine increased less than five-tenths of 1 per cent.

Some articles showed no change in price during the month. They were sirloin steak and round steak.

For the year period, September 15, 1922, to September 15, 1923, the increase in all articles of food combined was 7 per cent.

For the ten-year period, September 15, 1913, to September 15, 1923, the increase in all articles of food combined was 46 per cent.

START EMPLOYEES' PENSION FUND.

An employees' retirement fund, embodying a savings plan, life insurance and bonus for thrift, has been announced by the Cudahy Bros. Packing Co., Cudahy, Wis. The plan, effective January 1, 1924, affects 1,500 employees.

The company agrees to contribute 40 cents for every dollar deposited by an employee who continues in service until he reaches retirement age, 60 years for men, 55 for women. This will be deposited in the employees' mutual savings bank, plus 4 per cent interest. Employees are limited to maximum annual deposits of \$100.

If the 1,500 employees take up the plan, which is optional, and make the maximum deposit, a fund of more than \$200,000 will be deposited annually in the bank, \$150,000 by employees and the balance by the company.

The plan started by the Cudahy company differs from the pension plans of other packers, over which there has been litigation in Chicago courts. The Cudahy plan calls for the keeping of individual deposits of employees in separate accounts in the employees' mutual savings bank, along with the 40 per cent bonus, until the employee leaves the company or retires at old age. In the latter case employees will receive monthly payments for life.

Under the plan, if an employee dies before reaching the age limit, his savings account, plus the company's bonus, reverts to his family in the form of insurance. If an employee leaves the company before reaching the age limit he withdraws his savings and interest, but forfeits the company's bonus.

STOCKYARDS \$38,115 AN ACRE.

The Chicago Union Stockyards, comprising 320 acres, and purchased in 1865 for \$100,000, are at present in 1923 valued at 87½ cents a square foot, or \$38,115 an acre, not taking into consideration land and street improvements above or below ground, but including train and other transportation facilities and labor advantages, according to George C. Olcott, Chicago appraiser.

Mr. Olcott, who appraised the stockyards at the request of the government, was one of the principal witnesses before a representative of the federal packers and stockyards administration which is trying to determine fair charges at the yards, including reweighing tariffs complained of by the livestock traders.

Mr. Olcott said the yards property, without the packing-house land, was valued at 75 cents a square foot. Counsel for the yards objected to much of his testimony. The hearing may continue for two weeks.

300 ton direct connected Electric Driven De La Vergne High Speed Machine

De La Vergne Ice & Refrigerating Machines

De La Vergne high speed horizontal machines have been in actual use longer than any other design. The patented auxiliary suction port is a great advantage, not only increasing the efficiency but insuring perfect lubrication.

De La Vergne medium and low speed machines are also offered to suit any requirements.

BRINE SPRAY REFRIGERATION

Brine Spray Refrigeration is reduced to a science by using Webster Brine Sprays **applied by our methods.**

Weak brine at high temperatures is used with remarkable results, permitting the use of higher ammonia suction pressures, which naturally increases capacity of the ice machine with lower power consumption. Pressures required on Webster Brine Sprays range from 3 to 9 lbs., resulting in reduced pumping costs.

If you are contemplating additional cooler space, or planning to change your direct expansion piping or brine circulating system to Brine Spray Systems, our broad experience will help you to economize. Complete brine spray systems installed; **results guaranteed.**

LAFAYETTE BUILDING, PHILADELPHIA
MONADNOCK BLOCK, CHICAGO.

PACKINGHOUSE ENGINEERS BUSY.

The firm of Himmelsbach & Schlich, packinghouse engineers and architects, is lately extending its business into various other states outside of New York.

Among the works recently completed around New York are a refrigerating building and powerhouse for Chas. Miller & Co. in North Bergen, N. J.; extensive alterations and additions for D. Blumberg & Son in Brooklyn; and what health officials call the most up-to-date non-edible rendering plant, for A. Aaron, Inc., in Brooklyn, N. Y.

At present they are building for the Central Abattoir Co. and Penn Abattoir Co. in Reading, Pa., the Trenton Packing Co. in Trenton, N. J., and Kaufman Packing Co. in Baltimore, Md., and have lately added F. G. Vogt & Sons, Inc., in Philadelphia, to their list of clients.

Besides these buildings they are erecting other plants pertaining to the food industry in the line of dairies and chemical factories, and as both Mr. Himmelsbach and Mr. Schlich, through personal supervision of the design and construction of their work, have gained the confidence of their clients, a greater amount of work for them seems to be assured.

A STEER AND HAM STORY.

The Val Decker Packing Co., Piqua, Ohio, mailed the Cincinnati Butcher Supply Co. a photo of five champion steers shown at the Ohio State Fair, of which they bought one at the top price of 19 cents per pound. The "BOSS" firm complimented the packing company on its enterprise and wished them the same benefits from the steer as a London butcher derived from the hogs raised at the farm of the King of England, for which he had to pay the highest price. When a friend asked him how he could afford it, he told him confidentially, "You don't know 'ow many 'ams I sell from these 'ogs."

MISSIONARY WORK FOR MEAT.

Telling consumers all over the country that beef is always in season, is the message of a full-page educational advertisement that is appearing in leading women's magazines for November. The housewife is told about the various cuts of beef by actual illustrations in color, of which there are some 28 in number. This attractive missionary work in the cause of meat is a part of the work being carried on by Swift & Company. It is a benefit to the whole meat business, because it is teaching the public to buy meat intelligently.

The Key that
Unlocks the Door
to INCREASED PROFITS

THOUSANDS of York Machines have paid for themselves, and are now earning substantial dividends for their owners. These machines are designed for service, built of the best materials for the purpose, thoroughly tested and rigidly inspected before shipment. They are self-contained, require very little attention and do not require a skilled operator. There is probably no other equipment you can buy that will be a greater help in increasing your profits than a York Refrigerating Machine.

HIDE RESEARCH TEACHES LESSON.

In an address before the Tanners' Council of America at its annual meeting at Chicago last week, Dr. Arthur Lowenstein, vice-president of Wilson & Company, and chairman of the Committee on Scientific Research of the Institute of American Meat Packers, said:

Packers as a whole have for many years put forth great efforts to deliver hides of a character which makes for the betterment of the leather industry. It is naturally to their interest to do so, and to make such improvements in trim, prevention of scoring, etc., as possible, in view of the fact that their entire accumulation of hides at all plants goes to the tanneries.

I believe that on the whole this work is well done. I am inclined to think that it must have been well done over a long period of time, because of the fact that so far as I can see there is no fundamental difference in the method of handling hides today, from the time they are taken from the animal until they are shipped to the tanneries, and the method of 20 years ago, when I first came into the packing-house industry, served a certain amount of time in the hide cellar, and was looking at the product of each of the departments from the standpoint of bettering the product.

So if I may I will conclude my discussion on "Packer Hides" simply with the statement that so far as I can see today the proper precautions are being taken in connection with the care in selection, grading, trim, prevention of cuts, in handling product on the scale on which such products are handled. Recently, in making inspections and consulting with our operating folks who handle the subject as part of their everyday routine, I find that this work is being well done by the old, long-established process of handling.

The Value of Research.

The Tanners' Council of America is to be congratulated on its vision and courage in connection with the fundamental work of the industry. It has taken rare vision and exceptional courage for an industry which has gone through the conditions familiar to all of you, to be able to appropriate the funds which I understand you have provided in connection with your educational and research work at the University of Cincinnati. I think it has taken exceptional foresight and courage on the part of your executives first to secure a man of the caliber of Professor McLaughlin to conduct your research work, and secondly, to support him in his selection as his first problem the study of hides (your basic raw material) along fundamental research lines.

It is my pleasure to extend the greetings of Mr. Herrick, president of the Institute of American Meat Packers, and Mr. Thomas E. Wilson, chairman of the Plan Commission of the Institute of American Meat Packers, to you gentlemen. The Institute greets you and admires the foresight and courage which I have just referred to. We are watching closely this fundamental work which you are carrying on, and it has been our pleasure at our last two annual conventions to have with us, as one of our speakers, the director of your research work.

Began at the Base.

One of the particular pieces of work in which I have been engaged recently has been to help secure a Director of Scientific Research for the Institute of American Meat Packers, and I know the difficulty which one encounters in making that selection. The value of having a man with a trained, orderly mind is apparent in the method of approach which you have made in your research work.

You began your investigation by a study of the raw material of the industry; that is, heavy hides. You began this work by first making an investigation on a labor-

atory scale of the effect of different methods of salting hides, and after you had made this laboratory investigation you arranged for some comparatively small plant tests to prove your conclusions in a practical way.

I am glad that my company had an opportunity to participate in making these initial tests, which as I recollect consisted of putting down a thousand hides under the direction of Professor McLaughlin, half to be treated by his improved method and half to be treated by the regular factory process. These hides were then taken to the tanneries and changed into the finished leather so that conclusion could be drawn from comparison of the two lots of leather, which indicated that the new method of handling was an improvement, especially in that it did away with blood stains and other defects.

DR. ARTHUR LOWENSTEIN
(Vice-President, Wilson & Company),
Founder of the Lowenstein Fellowship for
Packinghouse Research.

Then you arranged for a larger and more extensive plant test to be carried on in co-operation with the Institute of American Meat Packers. This test, as I recol-

lect it, contemplated the putting down of approximately 50,000 hides under Mr. McLaughlin's direction, these hides to be taken through the tannery for a final test of the finished leather. As I understand it this test is now in process.

Order of the Hide Tests.

Professor McLaughlin, as you know, has published a number of reports on his work, beginning first with the study of the chemical changes taking place in the animal skin during curing. Second, a study of the bacteriological action taking place during curing of animal skins, with the idea of getting at the fundamental causes of the changes taking place in the curing, as it was his opinion that the curing of the hides was the fundamental question connected with the leather industry. His results have clearly indicated that to obtain fine leather the method of curing and handling the hide itself is of fundamental importance.

Then he has taken up as a logical sequence for the next step, the proper method of putting the cured hide back into condition to tan, and he has covered this in his article entitled "The Science of Soaking," in which he discusses fundamental ideas regarding the idea of soaking cured hides and restoring them to a proper condition to be tanned.

In his article on "The Science of Soaking" he has studied not only the bacteriological and chemical changes which take place, but shows what are the changes that take place in this process. And from these fundamental ideas as to changes he has undertaken new practical tests to put into application laboratory experiments which are, of course, just preliminary. I take it that after he has made some small plant tests on soaking, studying the results obtained during the laboratory tests, that he will then undertake some larger tests covering the same subject.

The Proper Method to Pursue.

I have gone into his methods somewhat
(Continued on page 46.)

DOLD IN BUFFALO SAFETY PARADE.

Aiding the work of the National Safety Congress, which was held recently in Buffalo, N. Y., the Jacob Dold Packing Co. decorated and entered in the safety parade a float which aroused much favorable comment. The float represented a rural school with hogs for pupils and a hog for a teacher. On the side of the school were the statements "Pigville School Safety Lessons" and the declaration "You must be healthy to pass Uncle Sam's inspectors." On the bottom of the float was this statement: "Insist upon meats from government inspected plants."

UNIQUE DOLD FLOAT IN THE SAFETY PARADE AT BUFFALO.

Chicago Section

Myron McMillan of the J. T. McMillan Co., St. Paul, Minn., was in Chicago this week.

President Charles E. Herrick of the Institute of American Meat Packers was in New York this week.

L. J. Roversi, of Tupman, Thurlow & Co., New York, was a visitor to Chicago during the past week.

John W. Parker of the Portland Vegetable Oil Co., Portland, Ore., was in Chicago during the last few days.

Fire recently destroyed the fertilizer plant of Darling & Co. at the Union Stock Yards entailing a loss estimated at \$75,000.

Packers' purchases of livestock at Chicago for the first three days of this week totaled 32,646 cattle, 7,766 calves, 85,955 hogs, and 30,869 sheep.

James S. Agar is again a proud grandfather, daughter Ruth, who is Mrs. Jaicks, of 1361 Hyde Park boulevard, having presented him with a bouncing grandson two weeks ago.

Swift & Company's sales of carcass beef in Chicago for the week ending Saturday, October 20, for shipment sold out, ranged from 7.00 to 20.00 cents per pound, averaged 12.41 cents per pound.

Charles Turpie, a well-known wholesale provision merchant of Derby, England, is in the United States making a tour of inspection of American packing plants. He has been spending several weeks in Chicago.

F. J. Leonard, for many years superintendent of branch house construction for Swift & Company, and now a general contractor specializing in cold storage, meat packing and industrial plants in Portland, Ore., has been in Chicago during the past few days renewing old acquaintances.

Vice-president C. B. Heinemann of the Institute of American Meat Packers has

returned from the South where he attended the Alabama Fat Stock Show at Montgomery, Ala. This show was a great success and some good stock was shown which indicates the possibilities of the South in livestock production.

Provision shipments from Chicago for the week ending October 20, with comparisons, were as follows:

	Last week.	Prev. week.	Last year.
Cured meats, lbs.	20,038,000	13,450,000	13,926,000
Lard, lbs.	15,356,000	11,308,000	11,332,000
Fresh meats, lbs.	23,518,000	21,541,000	22,890,000
Pork, bbls.	3,000	3,000	5,000
Canned meats, boxes	16,000	12,000	17,000

DR. J. J. HAYES
(Armour & Company, Chicago),
Chairman Committee to Confer with Govern-
ment Officials, Institute of American
Meat Packers.

J. A. Palmier, of Antwerp, Belgium, has been in Chicago as the guest of Fred and Max Guggenheim and Barney Brennan. It is needless to say that he has not had a dull moment. Mr. Palmier is the representative of the Brennan Packing Co. and Guggenheim Bros. in Belgium, and has been looking over the packing situation here.

HIDE RESEARCH TEACHES LESSON.

(Continued from page 45.)

at length to show first what is the proper scientific method and then to show the proper technical method of applying the results of scientific knowledge to the problems of industry.

I had the pleasure of visiting Professor McLaughlin at Cincinnati in June and had the opportunity of listening to him and obtaining first hand his method of approaching a difficult scientific problem.

You must remember that the packers with their large scientific staffs have gone along for many years, as indicated in my preliminary remarks, without making any substantial change in the method of preparing the hide for your use. And I regard it as an outstanding result that the tanners through their research organizations have had the courage to approach the problem of another industry, which concerned them of course, from the standpoint that that industry furnished their raw material, and to attack this fundamental problem as preliminary to attacking some of the major problems in their own industry.

But the results have proved this method to have been justified. I can well conceive that many of your membership perhaps had grave doubts as to the wisdom of this procedure. Some of your members no doubt said "Why should we attack this problem? I have many questions of a practical nature on tanning that I should like to put to the Director of Research work." They might have continued their interrogation, and said you were attacking a fundamental problem which might take years of investigation before you would be able to find some concrete practical result, and that you have many problems in the tanning industry which are susceptible of quick attack by experts which will yield quickly practical results to the tanning industry.

Packers Will Co-operate.

I can imagine many such problems confronting you, and therefore I have paid tribute to your vision and your courage in first appropriating the funds to carry on this work, second in your selection of the man to direct the work, and third in not being deterred from making an attack on the basic product underlying your industry.

I said that we are watching your work with a great deal of interest. We are co-operating with you through one of the committees of the Institute of American Meat Packers, and it is hoped that shortly our Committee on Scientific Research will assist perhaps by the establishment of a fellowship at the University of Cincinnati, so that other work in the curing, perhaps, of skins from sheep and calves might be carried on alongside the constructive work which you are doing. Should we decide that we want to do this, we will naturally only undertake it in the closest cooperation with your organization.

Napier Improved Patented Hydro-Electric Stuffer

A complete unit self contained—no piping or setting up charges—Fill tank with water, attach plug to light socket and you are ready to operate. Working pressure under control at all times. Can be set and held at any pressure from 0 to 80 lbs. Piston is raised by water pressure; therefore no air in the casing and no accidents. Head is opened and closed by movement of only one lever. Let us prove every claim we make for this machine. Further information and descriptive matter upon request.

Retail Section

More Facts on Retail Expenses

Expenses, Sales and Stock Turnover Contrasted—Some Operating Standards for Dealers Who Make Profit

By Horace Secrist, Director Bureau of Business Research,
Northwestern University

(EDITOR'S NOTE.—This is the third of a series by Dr. Secrist giving results of a study of costs in operating retail markets. The first appeared in THE NATIONAL PROVISIONER of September 8 and the second on September 29. The study was made in three cities, and was under the joint auspices of Northwestern University and the U. S. Department of Agriculture.

Other reports will follow in later issues of THE NATIONAL PROVISIONER.

A valuable study by Dr. Secrist of the "Meat Retailer As a Business Man" appeared in THE NATIONAL PROVISIONER of August 18.

Reprints of any or all of these studies may be had upon application to THE NATIONAL PROVISIONER, Old Colony Bldg., Chicago, Ill., accompanied by a 2-cent stamp.)

I

Conditions in the Trade.

The latest information on the cost of retailing meat collected by the Bureau of Business Research, Northwestern University, and by the Department of Agriculture reveals some new facts and points unmistakably to the presence of certain fundamental operating conditions for merchants differently situated, doing different volumes of business, and serving different types of trade.

The average cost of doing business for reporting stores in Chicago for the six four-week periods, February 26 to August 11, was 20 per cent of sales. For the period August-September, the corresponding figure was 19.2, and for the period September 8 to October 6, 18.2. Wages for the six periods averaged 13.0 per cent of sales.

In the last period, September-October, the ratio was 11.7. Rent took 2.3 per cent of sales during the six periods; in September-October the ratio was 1.9. Merchants turned their stock every 4.2 days during the six four-week periods; in September-October this fact was accomplished every 3.6 days.

While it cost Chicago merchants 20 per cent to do business, the corresponding cost for shops in Cleveland was 21.6; in New York, 21.5, and in outlying cities 18.1. Stock was turned every 3.9 days in Cleveland, every 4.4 days in New York, and every 5.9 days in the other cities.

These costs and ratios of stock turn fairly well describe the situation in the different cities during September-October. For a group of identical stores in Chicago, sales in September-October increased 5 per cent over those in the period August-September; expenses, however, increased at the same rate, leaving the merchants' positions in the two periods unchanged.

When all experience available is considered, the cost of doing business for Chicago merchants in the September-October period was 1.8 less than for the six four-week periods ending August 11. Much the same condition holds for the other cities. Expenses to sales seem to hold at approximately 20 per cent. The details on

costs of doing business for the trade as a whole are shown in Table I.

II

Some Individual Experiences of Retail Meat Dealers in Chicago During the Last Eight Months.

Quite as interesting as the combined experiences of retail meat dealers as a class are those for individual dealers. Data for the trade as a whole do not reveal the operations of either the successful or the unsuccessful merchant. It is only when individual experiences are given that merchants are able to observe the standards of excellence which can be achieved and those of failure which must be avoided.

In order to show what has happened to fourteen retailers during the period February 26 to October 6, Table II is inserted. This little table is instructive. Opposite the letters, which are used to designate the firms, are shown the operating expenses for each firm for the different four-week periods during the past eight months.

It will be noticed that some have been able to keep their operating cost at essentially uniform levels. For others their costs have violently fluctuated from month to month. Moreover, some of their costs are low when the whole period is considered, while others are equally high. Eight months is too short a period to indicate the way in which merchants can adjust themselves to different economic conditions, but it is long enough at least to suggest if not definitely to show what changes obtain in the trade as it is carried on.

It is interesting to study those expense ratios in the light of the profits which the merchants make. The expenses of merchants who suffered losses in the different periods are marked with parentheses. While there are exceptions to the rule, it will be noticed that merchants with low operating expenses more frequently make a profit than do those with high operating expenses.

Competition in the trade makes it difficult for merchants to increase the margin under which they can do business. The effects of their management, however, are clearly shown in their operating expenses. If profits are to be made, it is the expense end of their business which must receive attention.

III

The Progress of Stores, Types "A" and "B."

In another story, two shops in the retail meat field were taken as types—store "A," a constant loser; and store "B," a constant winner. Merchants will be interested in the "health" of both of these establishments since the last report.

Both are "progressing"—"A" further and further toward ultimate failure; "B" just

as surely further along on the road of conspicuous success.

"A" fails with a cost of operation of 29 per cent, while "B" succeeds with a cost of 17 per cent.

"A" with difficulty turns his stock once in 10 or 12 days; "B" accomplishes this in 2 or 3 days.

It will be interesting to watch the further development of these two stores which may be taken as typical of the successful and the unsuccessful store in this field.

IV

Operating Standards of Meat Dealers in Chicago Who Are Consistently Making a Profit—Something at Which to Aim.

Our study of the experiences of retail meat dealers point unmistakably to definite standards which merchants must equal or exceed if they are to continue to make a reasonable profit. Let us set those down in a brief form, indicating for each of five major conditions of operation those standards which are **most common**; those which are **very common**; and those which may be called **common**.

1. Going Ratios of Purchases to Sales.

The **most common** ratio of purchases to sales is 76 to 78 per cent. **Very common** ratios occur at 72 to 74 per cent, those ratios appearing 95 per cent as frequently as the **very common** ones. Ratios of 68 to 72 per cent are also **common**, the number of stores having them being about 72 per cent as large as those which have ratios which are **most common**.

2. Going Ratios of Gross Margins to Sales.

The **most common** gross margins for stores making a profit are from 25 to 27 per cent of sales. On the other hand, ratios from 23 to 25 are **very common**, the same being found 85 per cent as frequently as the **most common** ones. Other **common** ratios are from 21 to 23 per cent. These appear 75 per cent as frequently as those which are **most common**.

3. Going Ratios of Total Operating Expenses to Sales.

The **most common** cost of doing business for merchants who make a profit is 21 to 21½ per cent of sales. However 18½ to 20 per cent are **very common** costs, these occurring in about 65 per cent as many cases as those which are **most common**. However, ratios of 17 to 18½ are **common**, but less frequently encountered than those which are characterized as **most common** and **very common**.

4. Going Ratios of Total Wages to Sales.

The **most common** amount which total wages constitute of sales for successful merchants is between 11 and 13 per cent. A smaller per cent of concerns—83 per cent as large a number—have ratios of 13 to 15 per cent. These are **very common**. On the other hand, a still smaller percentage have ratios of 15 to 17 per cent of sales. These are **common**, but less frequently encountered than the other ratios which are named.

5. Going Ratios of Rent to Sales.

Expenditures for rent in relation to sales obviously vary widely with store location and with volume of business done. It is possible, however, for a group of stores who consistently make a profit to determine the **most common** amounts which are paid for this purpose. Such per cents vary from 1.4 to 2.0.

Very common ratios, however, are 2.6 to 3.2, and **common** ones 2.0 to 2.6. The frequency with which these different ratios

are encountered in stores is as follows: The **very common** ones occur 89 per cent as frequently, and the **common** ones 67 per cent as frequently as those which are **most common**.

What can merchants conclude from these standards?

Simply this. If profits are to be made, merchants must have gross margins as large as those indicated, and keep their operating expenses within the limits found. The higher the gross margin with a given expense, the greater the profit. The lower the gross margin with a given expense, the smaller the profit. Gross margins are largely beyond the control of individual merchants. Operating expenses, however, are different. Successful merchandising is the key to their control.

It would be interesting to know how many merchants are able to meet these standards. Merchants are entitled to reasonable profits. They cannot successfully remain in business without receiving them. If they meet these standards, profits are reasonably certain. If they fall below them, losses are almost surely to be incurred.

Clyde Manes has bought the meat market at 320 South Central avenue, Canonsburg, Pa.

Paul H. Smith has bought the meat market at 2301 Martindale avenue, Indianapolis, Ind.

W. J. Burnett and Richard Burnett have bought the meat business of the J. F. Roose grocery at 1910 West Tenth avenue, Topeka, Kans.

L. A. Butler has started a new meat market at 19 South Fourth street, Terre Haute, Ind.

Louis Freeman has bought the meat market at 1002 South Illinois street, Indianapolis, Ind.

R. W. Peckham has opened the Federated Market No. 2 at 2738 Washington street, Houston, Tex.

T. E. Scott has opened a line of groceries in connection with his market at Eldorado, Kans.

W. E. Parramore will shortly open a new meat market at 549 East Third street, Middletown, O.

Michael Muntean has purchased the meat market at 791 Indiana avenue, Indianapolis, Ind.

New York Section

Wilson's New York Fellowship Club expect to hold a beefsteak dinner and dance on November 10 at the main office of the company, 45th street and First avenue.

Plans for an oil plant for Louis Stern Sons, Inc., Kearny, N. J., are being drawn up by Himmelsbach & Schlich, the well-known packinghouse engineers, of New York.

C. H. Kane, construction department, W. S. Johnston, beef cutting department, Chicago, and A. E. Bump, construction department, Boston, Swift & Company, were in New York this week.

Prices realized on Swift & Company's sales of carcass beef in New York City for the week ending October 20, 1923, on shipments sold out, ranged from 9.00 cents to 21.00 cents per pound, and averaged 15.63 cents per pound.

Harold Heim, an active member of the United Master Butchers of America, and Mrs. Heim are receiving the congratulations of their friends upon the arrival of a little son. Grandpa Joe Heim is wearing the smile that won't come off.

A. F. Grimm celebrated his fifty-fourth birthday on Thursday evening, October 24, at a dinner in the Hotel Belmont. Mr. Grimm received congratulations and well wishes from a host of friends and admirers.

A. Watson Armour, C. W. Myers, advertising department, Chas. Ikle, superintendent's department, Dr. J. J. Hayes, J. A. Brown, auditing department, and H. A. Phillips, dressed sheep department, Armour & Company, Chicago, are visiting the city.

President Charles E. Herrick of the Institute of American Meat Packers was in New York this week as a speaker at the second American World Humane Conference. Packers are cooperating in finding more humane methods of slaughtering under the leadership of the Institute.

Auto trips on Sunday have become quite a pastime with a number of the butchers of Greater New York, and quite some ground is covered in one day. Last Sunday Mr. and Mrs. A. F. Grimm, with Mr. and Mrs. Frank P. Burck and their son, Arthur, motored to Connecticut and back in the same day.

The following is a report of the New York City Health Department of the number of pounds of meat, fish, poultry and game seized and destroyed in the city of New York during the week ending October 20, 1923: Meat—Manhattan, 3,652 lbs.; Brooklyn, 91 lbs.; The Bronx, 100 lbs.; Richmond, 10 lbs.; total, 3,853 lbs. Fish—Brooklyn, 27 lbs.; total, 27 lbs. Poultry and Game—Manhattan, 300 lbs.; total, 300 lbs.

Fred Hirsch, business manager of the Bronx Branch, United Master Butchers of America, has secured an extension of time until November 15th for the members of the Bronx Branch with reference to the enforcement of the sanitary code, requiring a certificate of health for all handlers of foods. Mr. Hirsch states this is an old law, having been introduced some six years ago, but which will now be rigidly enforced.

DEATH OF GEORGE SHAFFER, SR.

In the passing of George Shaffer, Sr., probably one of the best known figures in retail butchery from New York to the Coast has gone.

Mr. Shaffer started in business some forty years ago at 474 Fourth avenue, moving about twenty-five years later to the present location, 673 Madison avenue, where he conducted one of the finest markets in the city, which was built up entirely by his untiring efforts and aggressiveness, as he started with practically nothing. Out of thirty-two years of his business career he did not miss thirty-two days.

THE LATE GEORGE H. SHAFFER.

ness career he did not miss thirty-two days.

Mr. Shaffer was a pioneer in the master butchers' association. He was the president of the East Side branch, which later consolidated with the West Side, forming the present Ye Olde New York branch.

When the national master butchers' association was formed there were two distinct organizations, one in the West and one in the East, and it was Mr. Shaffer's great ambition to have one big association. To this end a conference was called in Washington, resulting in the amalgamation of the two societies, and Mr. Shaffer was made the first president of the National Association of United Master Butchers. His work for the master butchers was one of his pleasures, and when he learned anything of value in his own business he passed it along to his brother members.

He was director of the New York Butchers' Calfskin Association from 1907 to 1921 and a member of the New York Athletic Association.

About a year ago he was taken ill with

appendicitis and removed to the hospital where he remained some four weeks, but coming back to business he took a severe cold which confined him to his home for four weeks, after which he spent a month in Havana and Palm Beach recuperating. Mr. Shaffer spent the summer in Bellport, L. I., where his health seemed to improve wonderfully until the early part of September when he suffered a heart attack and at that time the doctors had very little hope of his recovery.

But his strong constitution asserted itself and on Sunday his three physicians had great hopes of his ultimate recovery. On Monday his condition seemed to improve until 5:30 p. m., when, while talking to his nurse, he complained of feeling dizzy and fell back dead.

Mr. Shaffer was in his 63rd year. He is survived by his widow, Amelia, a daughter, Grace, and his son, George, Jr., the latter having been in charge of the business during his father's illness. Masonic funeral services were held at the home on Wednesday evening, and on Thursday morning the remains were brought to St. James' Lutheran Church at 73rd street and Madison avenue. The interment was in Woodlawn cemetery. A floral piece from the Ye Olde New York branch was among the mass of flowers, and a delegation from this branch, as well as from the board of directors of the New York Butchers' Calfskin Association, attended the funeral.

WASHINGTON HEIGHTS BUTCHERS.

The meeting of the Washington Heights branch, United Master Butchers of America, held on Monday evening was very well attended and a lively interest was taken in the various discussions. Four visitors added life to the meeting; they were Fred Hirsch of the Bronx, who brought his usual pep; Rudolph Schumacher, also of the Bronx, and George Kramer and L. Goldstein of Ye Olde New York branch. The proposed theater party was laid over until the next meeting, when arrangements will be made for a social of some kind. Mr. Hirsch announced the package party of the Bronx branch on Wednesday evening.

The plate glass and fire fund was reported as progressing nicely by President Hembdt.

The attention of the members was also called to the fact that the association had made arrangements with a physician, who would examine butchers and their employees and issue certificates of health in accordance with the recent sanitary code of the Department of Health, which will be put into effect on November 1. Due to a number of people being examined at the one time, the charge will be much less than usual, and the members with their employees were requested to be at the next meeting, November 12, for examination.

The code was discussed very thoroughly and the members expressed themselves as being in favor of the law, as they realize it will not only mean a more cleanly handling of meat, but also will protect the public as well as the butcher himself.

Attention was called to the Sunday-closing law, which has been violated in Washington Heights. It was also stated that some restaurants in this section were selling uncooked meats on Sunday. The branch is keeping a keen watch on the situation and is organizing a campaign to combat the violation of the Sunday-closing ordinance.

General Motors Trucks

A GMC in use for Kum-bak Meat Market

Companies that consider trucks a most important factor in the growth and success of a business invariably choose GMC trucks, because they make quick deliveries at minimum expense and are able to overcome unusual road and load conditions. In the provision industry such companies as Sw'ft, Morris, Armour operate fleets of GMC trucks in all parts of the country.

GMC chassis list at the factory as follows: 1-ton \$1,295; 2-ton \$2,375; 3½-ton \$3,600; 5-ton \$3,950; tax to be added.

HUDSON COUNTY SAUSAGE DRIVE.

Fred Finkeldey, chairman of the sausage campaign of the Hudson County Meat Council, in checking up the results of the October 2 to 9 week of pushing sausage in the second biggest county in New Jersey, declared that the extra amount of sausage sold fully justified the expense and time spent preparing for the drive. The weather, which many members predicted would be crisp and autumnish and satisfactory in appealing to the appetites of sausage lovers, did not run true to form for this season, and the drive was held with poor weather prevailing. In spite of this, many retailers in the various good-sized towns in the county reported double the amount of sales expected.

More than 1,500 colored posters, proclaiming sausage as an appetizing dish, were printed and distributed by the wholesalers, through their salesmen or wagon drivers, to the retailers' shops, where they were pasted on the windows and behind the counters. A few days before these posters were ready for distribution, a sales letter, pointing out the advantages of sausage, was sent to every retailer in Hudson County. At the time of the start of the campaign, October 2, publicity

No. 10 Short Column

Same QUALITY—Same FEATURES. With electric or reflector attachment.

BARNES SHORT COLUMN SCALES FOR REFRIGERATED COUNTERS

The Barnes Short Column is 2½ inches lower than our Regular, so that when it is set up on a refrigerated counter or any other high counter the reading line will be at the level of the merchant's eye. This does away with the disagreeable feature of having to look up at the chart or standing on a platform to be at the correct height.

BARNES SCALE CO.
Detroit, Michigan

stories appeared in the several Hudson County daily newspapers. The Hoboken Observer printed a story on the first page. Other daily newspapers from remote sections of the country copied this first-page story, and Chairman Cooke of the Council has received scores of letters from housewives asking for a copy of the sausage booklet which was mentioned in the stories. Letters from Ontario, Canada; Duluth, Minn., and St. Louis, Mo., were among those received. Hundreds of sausage booklets were dis-

tributed to the domestic science classes of the high schools of Hudson County during the drive.

Because of the success attending the sausage campaign, the Council, at its last meeting voted to hold a "Liver and Bacon week." The plans for carrying this drive through are the same as used during sausage week. The same committee, composed of Fred Finkeldey, chairman; Al Sullivan, J. A. Robinson, Fred Guterl, H. W. Schmidt and J. Schuck, will be in charge.
